Sharks of Polynesia Richard H. Johnson, 1978 **Sharks of Polynesia** Richard Hanslee Johnson, 1987 **Sharks of Tropical and Temperate Seas** Richard Hanslee Johnson, 1978 *Sharks of Tropical and Temperate Seas* Richard Hanslee Johnson, 1995 **Sharks of the Open Ocean** Merry D. Camhi, Ellen K. Pikitch, Elizabeth A. Babcock, 2009-01-21 This important and exciting title represents the first authoritative volume focussed on pelagic open ocean sharks as a group. Virtually every pelagic shark expert in the world has contributed to this landmark publication which includes the latest data and knowledge on pelagic shark biology, fisheries management and conservation. Pelagic sharks face unprecedented levels of exploitation in all the world's oceans through both direct fisheries and by catch, and effective management for these species is contingent upon solid science and data which this book brings together for the first time. All those involved in shark biology will need to have a copy of this book.

Conservation Physiology Christine L. Madliger, Craig E. Franklin, Oliver P. Love, Steven J. Cooke, 2021 This novel textbook provides the first consolidated overview of the scope, purpose and applications of conservation physiology with a focus on wildlife. It outlines the major avenues and advances by which the field is contributing to the monitoring, management and restoration of wild animal populations.

Sharks: Conservation, Governance and Management Erika J. Techera, Natalie Klein, 2014-06-05 The key aim of this book is to explore the global conservation and management of sharks. There has been a rapid decline in populations of many shark species while new science has emerged of the critical role they play in marine ecosystems. However, the authors show that conservation law and policy have been slow to develop with only a small number of iconic species being protected worldwide. The increase in fishing impact, primarily through shark finning and by catch, has led to shark conservation receiving greater international attention in recent years. The book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management. Recent trends are analysed including shark finning bans that have been put in place in several countries, the widening number of nations establishing shark sanctuaries and the growth of shark-based tourism. The efficacy of current listing processes for endangered species and fisheries regulations is also examined. Tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed. Contributors include leading authorities from universities and conservation organizations in North America, Europe and Australia. A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for interdisciplinary research and management approaches that are necessary to address the decline in sharks.

Shark Repellents From The Sea Bernard J. Zahuranec, 2019-09-16 Some species of sharks, because they are large, agile predators, are extremely dangerous to humans in water. During World War II, the long-time goal of an effective shark repellent was partially realized by the U.S. Navy's development of Shark Chaser, a copper acetate-negrosine dye mixture. But neither Shark Chaser nor other noxious or even extreme
