Sharp Edge Of Educational Change Teaching Leading And The Realities Of Reform:

The Sharp Edge of Educational Change Nina Bascia, Andy Hargreaves, 2000 This book brings together the evidence of recent educational research to convey the realities of reform as they affect educators practice *The Sharp Edge of Educational Change* Nina Bascia, Andy Hargreaves, 2014-01-14 The Sharp Edge of Educational Change conveys the realities of reform as they affect educators practice The collected chapters each focus on particular current reform and reveal the technical and logistical complications social and political dynamics cognitive disjunctures and limitations and emotional demands of reform In so doing they provide new and rich conceptual perspectives on the contemporary nature of teachers and administrators work in classrooms schools and other educational settings **Movements of Educational Reform** David A. Escobar Arcay, 2016-10-25 In a public education world of vast multiple rapid and often colliding educational reforms Movements of Educational Reform provides the novice as well as the veteran educator and administrator a sort of map of educational changes and processes Movements of Educational Reform is intended to help the devoted and dedicated education professional and scholar make sense of the successes and the pitfalls of reforms by tracing the landscape through four movements Movements promises to ignite and energize your passion for leading educational reform and to bring awareness of system strategies and its structural and cultural aspects many of which continue to challenge theorists practitioners and leaders of educational change **The Palgrave Handbook of Educational Leadership and Management Discourse** Fenwick W. English, 2022-10-13 This Handbook explores the discourse within the field of educational leadership and management It provides a clear analysis of the current field as well as older foundational ideas and newer concepts which are beginning to permeate the discussion The field of educational leadership and management has long acknowledged that educational contexts include a variety of leaders beyond school principals and other school officials such as informal and middle level leaders By looking at the knowledge dynamic rather than a static knowledge base this Handbook allows research to be presented in its multidimensional evolving reality **EBOOK: Being A Teacher In Higher Education** Peter Knight, 2002-07-16 Being A Teacher in Higher Education draws extensively on research literatures to give detailed advice about the core business of teaching instruction learning activities assessment planning and getting good evaluations It offers hundreds of practical suggestions in a collegial rather than didactic style This is not however another book of tips or heroic success stories For one thing Peter Knight appreciates the different circumstances that new part time and established teachers are in For another he insists that teaching well and enjoying it is as much about how teachers feel about themselves as it is about how many slick teaching techniques they can string together He argues that it is important to develop a sense of oneself as a good teacher particularly in increasingly difficult working conditions and it is for this reason that the final part of this work is about career management and handling change This is a book about doing teaching and being a teacher about reducing the likelihood of burn out and improving the chances of getting the psychic

rewards that make teaching fulfilling It is an optimistic book for teachers in universities many of whom feel that opportunities for professional fulfilment are becoming frozen *Between Caring & Counting* Lindsay Kerr,2006-12-15 One of the key planks of conservative Ontario premier Mike Harris s 1990s platform was education reform Amid a sea of official reports policy documents and expert opinions on education however the voices of actual classroom teachers were difficult to find This omission is redressed in Lindsay Kerr s *Between Caring Counting* Through a focus group of present day secondary school teachers in Toronto Kerr delivers a passionate account of the unassailably negative changes affecting secondary education and teachers work From a critical feminist perspective and using institutional ethnography Kerr situates the problem in education squarely as a conflict between an accounting logic and an ethic of care at the centre of education practice She exposes paradoxes inherent in education reform such as the increase of government control at the same time that government funding for education decreases She also connects educational restructuring to changes in the power relations of gender class and race across the public education system These local changes she finds do not reflect sound pedagogy but the imperatives of neoliberal globalization Counteracting despair with hope Kerr explores self reflexive suggestions for teacher educators to exercise agency in their lives and to continue to work toward a just and equitable public education system **International Conversations on Curriculum Studies** ,2009-01-01 This collection of essays from the most prominent scholars in the field of curriculum studies paint an intellectually rich palette of the present state of curriculum research across the countries and continents when the traditionally prevailed national imaginaries give increasingly way to transnational international and postnational impulses The main parameters of education subjectivity and its belonging is shifting by employing the contradictory and broader issues around the question of nation and nation state as well as around its traditional educational counterpart the psychologized individual both radically reinterpreted by post and rereadings of old educational and social canons *International Conversations on Curriculum* identifies the present transformations at work nationwide worldwide between and beyond by focusing on these shifts from a variety of methodological theoretical national political and pedagogic concerns It will open new and one could argue compelling vistas for reconsidering the social and political mission and moral purpose of education policies of curriculum theory and practice in the increasingly but unevenly connected world characterized by economic volatility unfair trade ethnic and religious conflicts and growing social instability and collective existential insecurity As such the essays are a vital international testimony to the scholarly vibrancy and to the global awareness of the current intellectualized field of curriculum studies to alertly recognize and register the cultural educational and political urgencies of our times *Culture and Technology Integration in Higher Education* Ling Li,2023-06-16 This book investigates universities technology implementation from a cultural perspective Through an ethnographic study conducted in a Chinese university the book examines the impact of culture on teachers technology adoption at multiple levels focusing on pedagogical beliefs personal level collegial culture

interpersonal level and managerial culture institutional level The finding reveals how culture influenced teachers perception interpretation and engagement with technology thereby upsetting the university s efforts to change With the wholesale top down adoption of education technology in the COVID 19 context this book is a timely treatise on a global understanding of culture s meaning in change implementation The culturally anchored issues documented in this book will shed light on the formulation of effective change strategies that focus on the minds of people and will be especially useful for those who strive to forge a more successful and sustainable future of higher education with technology

Internationalizing Teaching and Teacher Education for Equity Jubin Rahatzad,Hannah Dockrill,Suniti Sharma,JoAnn Phillion,2016-09-01 In Internationalizing Teaching and Teacher Education for Equity Engaging Alternative Knowledges Across Ideological Borders editors Jubin Rahatzad Hannah Dockrill JoAnn Phillion and Suniti Sharma present a collection of teacher educators cross cultural perspectives on the formation of knowledge through the internationalization of teacher education Each chapter contributes to ongoing discussions about the process of internationalization in teacher education and the impact of crossing ideological boundaries on the practice of teaching and teacher education The varied perspectives that authors offer establish the importance of ideological travel as imperative to preparing internationally competent educators This collection seeks to engage readers in a variety of critical reflections on the often presumed benefits of internationalization in teacher education Through questioning the presumed benefits of globalization as a hegemonic ideology readers will encounter alternative perspectives that demonstrate the possibility of thinking otherwise The diverse perspectives available in this book broaden theory research and practice working toward more critical spaces of engagement with the process of internationalization This collection intends to challenge the maintenance of the dominant ideologies internationally through research from a multiplicity of backgrounds Each chapter is informed by the authors commitment to an ethical practice within teacher education for the purpose of constructing equitable social relations understanding the process of internationalizing teacher education as a social justice movement Opportunities and challenges within international teacher education are offered to inspire meaningful praxis Planetary understandings inform readers through critical examinations of theory research and practice for the purpose of equitable social and educational transformations

Leading Learning: Making Hope Practical In Schools Lingard, Bob,Hayes, Debra,Mills, Martin,2003-07-01 How can we understand and theorise school leadership How can school leadership work towards enhancing student learning What are the constraints and possibilities for school leadership at the beginning of a new century This title is relevant to anyone concerned with improving schooling and enhancing the professional practices of educators The authors focus on leadership for enhancing student outcomes both academic and social While recognizing the significance of the principal or headteacher in school leadership the authors argue a strong case for the dispersal of leadership Based on extensive research conducted within schools Focuses on leading learning across the school Theoretically sound reflects the theories of Bourdieu and Foucault Politically aware discusses the

context of leadership within school communities educational systems global pressures new policy directions Current topical and thoughtful Leading Learning is key reading for principals or headteachers teachers and other school leaders policy makers and for students studying educational administration
