Shops Community Workers:

Community Worker's Guide Michel Lafortune, Annie Bouchard, 2010-10 Worker and Community Brian Greenberg, 1985-09-01 Worker and Community focuses on the social and cultural impact of industrialization in Albany New York during the middle decades of the nineteenth century More than a local study it uses Albany as a laboratory in which to examine this important force in social history The study looks first at the full range of economic actions in which the city s workers participated between 1850 and 1884 organized strikes labor riots public demonstrations and reform movements It also examines community influences as workers defined themselves in part through affiliation with a particular ethnic group church fraternal society and political party The worker s struggle against prison contract labor as discussed in Greenberg s text reveals acceptance of the free labor tradition along with an emerging interest group consciousness **National Labor Relations Board V. Community Shops, Inc** ,1961 **Exploring My School & Community Gr. 1** Ruth Solski, **Community Economic Development in Social Work** Steven D. Soifer, Joseph B. McNeely, Cathy Costa, Nancy Pickering-Bernheim, 2014-11-18 Community economic development CED is an increasingly essential factor in the revitalization of low to moderate income communities This cutting edge text explores the intersection of CED and social work practice which both focus on the well being of indigent communities and the empowerment of individuals and the communities in which they live This unique textbook emphasizes a holistic approach to community building that combines business and real estate development with a focus on stimulating family self reliance and community empowerment The result is an innovative approach to rehabilitating communities in decline while preserving resident demographics The authors delve deep into the social political human and financial capital involved in effecting change and how race and regional issues can complicate approaches and outcomes Throughout they integrate case examples to illustrate their strategies and conclude with a consideration of the critical role social workers can play in developing CED s next phase

Thomas,2024-11-01 Originally published in 1983 The Making of Community Work is the outcome of a two year study of community work in the United Kingdom The main purpose of the study was to review the development of community work and to suggest some of the issues in practice and training that might be important in the 1980s Much of the first part of the book is taken up with the emergence of community work as an occupation David Thomas tries to clarify its contribution to a number of political and social processes and to define community work in a way which distinguishes it from other kinds of interventions The second part of the book deals with training research literature and employment in community work it includes a review of college and field based training opportunities and a critical discussion of the state of theory and ideology in the occupation It was hoped it would be an important source of ideas and inspiration for the years ahead It was the first major review of community work since its re discovery in the 1960s it will still be of interest to all those involved in community work or wishing to understand its influence on other professions The book was intended for fieldworkers administrators policy makers trainers and students in community work and in related occupations and disciplines Thomas presents his ideas clearly and his ability to look critically at some of the basic assumptions in community work makes for stimulating and enjoyable reading

Factory and Community in Stalin's Russia Kenneth M. Straus,2010-11-23 Kenneth Straus weaves together many threads in Russian social history to develop a new theory of working class formation in the years of Stalin s First Five Year Plan In so doing he addresses a long standing debate among historians by suggesting new answers to an old question Was there social support for the Stalin regime among the Soviet working class during the 1930s and if so why Straus argues that the keys for interpreting Stalinism lie in occupational specialization on the one hand and community organization on the other He focuses on the daily life of the new Soviet workers in the factory and community arguing that the most significant new trends saw peasants becoming open hearth steel workers housewives becoming auto assembly line workers and machine operatives and youth training en masse rather than occupations categories in the vocational schools in the factories the FZU Tapping archival material only recently available and a wealth of published sources Straus presents Soviet social history within a new analytical framework suggesting that Stalinist forced industrialization and Soviet proletarianization is best understood within a comparative European framework in which the theories of Marx Durkheim and Weber best elucidate both the broad similarities with Western trends and the striking exceptional aspects of the Soviet experience
