Kay, 2014-11-10 The Glorious Revolution and the Continuity of Law explores the relationship between law and revolution Revolt armed or not is often viewed as the overthrow of legitimate rulers Historical experience however shows that revolutions are frequently accompanied by the invocation rather than the repudiation of law No example is clearer than that of the Glorious Revolution of 1688 89 At that time the unpopular but lawful Catholic king James II lost his throne and was replaced by his Protestant son in law and daughter William of Orange and Mary with James s attempt to recapture the throne thwarted at the Battle of the Boyne in Ireland The revolutionaries had to negotiate two contradictory but intensely held convictions The first was that the essential role of law in defining and regulating the activity of the state must be maintained The second was that constitutional arrangements to limit the unilateral authority of the monarch and preserve an indispensable role for the houses of parliament in public decision making had to be established In the circumstances of 1688 89 the revolutionaries could not be faithful to the second without betraying the first Their attempts to reconcile these

conflicting objectives involved the frequent employment of legal rhetoric to justify their actions In so doing they necessarily used the word law in different ways It could denote the specific rules of positive law it could simply express devotion to the large political and social values that underlay the legal system or it could do something in between In 1688-89 it meant all those things to different participants at different times This study adds a new dimension to the literature of the Glorious Revolution by describing analyzing and elaborating this central paradox the revolutionaries tried to break the rules of the constitution and at the same time be true to them

Educating the 'Unconstant Rabble' Ann McGruer, 2010-05-11 The English Revolution was a revolution in reading For the first time more people had access to books and other printed media containing a far broader spectrum of information than had previously been the case But an increase in access to material meant an increase in discussion and expression of opinions some of which had the potential to be detrimental to the stability of the state It was therefore in the

interest of the state to restrict access to this material to those that possessed the requisite educational training with which to understand the ideas and opinions now in circulation For Samuel Hartlib John Dury Johan Amos Comenius John Hall John Milton and Marchamont Nedham however the answer lay not in restricting access to information and education but rather in the extension of educational opportunity beyond the governing elite of the country in order to equip the emerging reading public with the skills they needed to take an active part in the political life of the country In the opinion of these writers it was only through effective educational reform that the political and religious growth of the country could continue A strong theme emerging within the tracts discussed in this book is that an adequately reformed educational system will provide the state with an able and useful populace on which they can depend in times of crisis Allied to this is the notion that the populace is entitled to receive a level of education appropriate to their abilities and talents and that the state bears a responsibility to play at least some part in providing that education whether formally or through the dissemination of information through the printing press As will be seen from the discussion of the literature produced at the time the ideas and reforms suggested within these tracts were the continuation of an intellectual context in which the development of learning and the expansion of knowledge were seen as paramount Drawing on the religious ideas of the millennium as well as the philosophical ideas of Bacon especially the writers to be considered here sought the reformation of the educational system as well as a broader series of social reforms in order to perfect the Reformation and make England ready for the new age

Postcolonial Theory and the Specter of Capital Vivek Chibber, 2013-03-12 Postcolonial theory has become enormously influential as a framework for understanding the Global South It is also a school of thought popular because of its rejection of the supposedly universalizing categories of the Enlightenment In this devastating critique mounted on behalf of the radical Enlightenment tradition Vivek Chibber offers the most comprehensive response yet to postcolonial theory Focusing on the hugely popular Subaltern Studies project Chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions He demonstrates that it is possible to affirm a universalizing theory without succumbing to Eurocentrism or reductionism Postcolonial Theory and the Specter of Capital promises to be a historical milestone in contemporary social theory

Troy House Ann Benson, 2017-03-09 The architectural history of Troy House in Monmouthshire is positioned at the centre of this extensive new research volume to support a consideration of how the surrounding land was refashioned over time Investigating the estate's main components first individually and then by cross referencing the findings extends our current understanding of them as discreet and at the same time interrelating entities Previously unrecorded historical features are discovered that belong to the house and its landscape and comprehensive evidence is applied to challenge current understandings The house and its pleasure gardens the walled garden the farm and the surrounding parkland are demonstrated together by this research to be a rare surviving example in Wales especially of a complete Tudor estate with Jacobean and Carolean aggrandisement As such Troy House occupies a significant place in
