The book has three chapters that cover the disciplines at the broadest level: humanities, social sciences, and sciences, plus supplemental chapters that focus on associated disciplines: research in history, business, and engineering; research using government sources; and across disciplines: interdisciplinary and critical information literacy. For the second edition of *Research within the Disciplines*, several chapters have been added that together give a broader and deeper overview of research across all subject areas: research practices of creative and performing artists and of clinical scientists; research in international documents; research strategies for foreign language materials and visual literacy across the disciplines. Major shifts in technology have been accounted for that have changed how we do research and have expanded the range of resources available to researchers in all disciplines. All of the chapters have been rewritten or heavily revised; this is much more a new book than a new edition. **France: Oxford Bibliographies Online Research Guide** Oxford University Press, 2010-06-01.
