Comes, 2000-1887 Edward Bellamy,1925 *Landscape and Utopia* Jody Beck,2022-12-22 This book examines three landmark utopian visions central to 20th century landscape architectural planning and architectural theory The period between the 1890s and the 1940s was a fertile time for utopian thinking Significant geographic shifts of large populations radically altered relations between capital and labor rapid technological developments large investments in transportation and energy infrastructure and repetitive economic disruptions motivated many individuals to wholly reimagine society including the connections between social relations and the built environment *Landscape and Utopia* examines the role of landscapes in the political imaginations of the Garden City the Radiant City and Broadacre City Each project uses landscapes to propose a reconstruction of the relationships between land labor and capital but while the projects are well known the role played by landscapes has been largely left unexamined Similarly the radical anti capitalism that underpinned each project has similarly been for the most part left out of contemporary discussions This book sets these projects within a historical and philosophical context and opens a discussion on the role of landscapes in society today This book will be a must read for instructors students and researchers of the history and theory of landscape architecture planning and architecture as well as utopian studies cultural and social history and environmental theory Moving Forward, Looking Back Sarah M.

Misemer,2010 Many critical shifts in concepts of time and society s consciousness of modernity were derived from the railway and World Standard Time in the nineteenth century These innovations restructured the way people viewed the world and dealt with public and private time The forward projectile motion along a linear track mimicked the passage of public chronological time Conversely the train also invoked a private nostalgic view of time as the traveler was yanked from his her traditional view of the space time continuum via the train s velocity Travelers observed the landscape disappear in their backward glance from the window although the landscape and interior compartment s space remained stagnant This optical illusion caused passengers to perceive the world in new ways Thus the train unveils a conflictive blend of nostalgia and progress in the River Plate as these countries move forward but look back New Directions in American Reception Study Philip Goldstein,James L. Utopian Audiences Kenneth M. Roemer,2003 How do readers transform Utopia How do they manipulate imaginary worlds to gain new perspectives of their own worlds In order to answer these and other questions this study employs a wide spectrum of reader response approaches to define the nature and impact of utopian literature *Americans in Dissent* Steven L. Piott,2014-10-15 *Americans in Dissent* is designed as a collection of biographical essays written for general readers and undergraduates that focuses on the topic of American dissent during the period from 1830 to 1890 Centered on influential nineteenth century social critics this volume shifts the focus of American reform away from romantic attempts at reforming the individual to more pragmatic efforts aimed at confronting social economic and political problems Coexisting with what seemed to be a preponderance of romantic idealism during much of the period was an undercurrent of genuine realism Instead of looking through the prism of a pre modern society many of these dissenters focused on how society was

becoming increasingly acquisitive and entrepreneurial They were among the first to question laissez faire individualism and unrestrained industrial capitalism and anticipated the critiques of later Progressive Era reformers Representing a wide range of interests each of the selections features a fascinating and provocative man or woman who offered a fundamental critique of American society and made a significant contribution to the development of the reform ethos that characterized the period
