Games and Game Playing in European Art and Literature, 16th-17th Centuries Robin O'Bryan, 2025-10-01 This collection of essays examines the vogue for games and game playing as expressed in art and literature in sixteenth and seventeenth century Europe Focusing on games as a leitmotif of creative expression these scholarly inquiries are framed as a response to two main questions how were games used to convey

special meanings in art and literature and how did games speak to greater issues in European society In chapters dealing with chess playing cards board games dice gambling and outdoor and sportive games essayists show how games were used by artists writers game makers and collectors in the service of love and war didactic and moralistic instruction commercial enterprise politics and diplomacy and assertions of civic and personal identity Offering innovative iconographical and literary interpretations their analyses reveal how games played written about illustrated and collected functioned as metaphors for a host of broader cultural issues related to gender relations and feminine power class distinctions and status ethical and sexual comportment philosophical and religious ideas and conditions of the mind

Playing Games in Nineteenth-Century Britain and America Ann R. Hawkins, Erin N. Bistline, Catherine S. Blackwell, Maura Ives, 2021-11-01 A vital part of daily life in the nineteenth century games and play were so familiar and so ubiquitous that their presence over time became almost invisible Technological advances during the century allowed for easier manufacturing and distribution of board games and books about games and the changing economic conditions created a larger market for them as well as more time in which to play them These changing conditions not only made games more profitable but they also increased the influence of games on many facets of culture *Playing Games in Nineteenth Century Britain and America* focuses on the material and visual culture of both American and British games examining how cultures of play intersect with evolving gender norms economic structures scientific discourses social movements and nationalist sentiments

Coins, Bodies, Games, and Gold Leslie Kurke, 2021-01-12 The invention of coinage in ancient Greece provided an arena in which rival political groups struggled to imprint their views on the world Here Leslie Kurke analyzes the ideological functions of Greek coinage as one of a number of symbolic practices that arise for the first time in the archaic period By linking the imagery of metals and coinage to stories about oracles prostitutes Eastern tyrants counterfeiting retail trade and games she traces the rising egalitarian ideology of the polis as well as the ongoing resistance of an elitist tradition to that development

The argument thus aims to contribute to a Greek history of ideologies to chart the ways ideological contestation works through concrete discourses and practices long before the emergence of explicit political theory To an elitist sensibility the use of almost pure silver stamped with the state's emblem was a suspicious alternative to the para political order of gift exchange It ultimately represented the undesirable encroachment of the public sphere of the egalitarian polis Kurke re creates a language of metals by analyzing the stories and practices associated with coinage in texts ranging from Herodotus and archaic poetry to Aristotle and Attic inscriptions She shows that a wide variety of imagery and terms fall into two opposing symbolic domains the city representing egalitarian order and the elite symposium a kind of anti city Exploring the tensions between these domains Kurke excavates a neglected portion of the Greek cultural imaginary in all its specificity and strangeness

Rethinking Territorial Development Policies: A new framework for territorial stakeholders Michel Felix, Philippe Vaesken, 2021-07-06 This book provides an analytical framework and toolkit for anyone involved theoretically or practically with the economic social ecological or cultural development of a territory This work provides an overview of the various territorial development processes inclusive of both individual and collective actions In pursuance of its objectives the book re-examines the classical concepts of governance and regulation in order to position them in an integrative model of the initiatives which contribute dynamically to territorial development According to this model the concepts of governance and regulation become two axes revealing four main reference situations which differentiate between the local initiatives ground up and public actions top down that coexist in a territory The model emphasizes the need to consider the place of territorial stakeholders in regulatory processes The book

enriches this concept familiar in a legislative context and describes it as an area of influence of and negotiation with shareholders. It contributes to a territorial governance system which encourages development. It reveals the inseparable link between influence and development processes that lead to value creation. The logic of governance specifies the various sources of value creation while the logic of regulation seeks to maximize the acceptability of such value creation by making it into an attractive proposition for stakeholders. *Our Paper*, 1905 **Fodor's Paris 2010** Fodor's, 2009
