Foundations of Insurance Economics Georges Dionne,Scott E. Harrington,2013-11-11 Economic and financial research on insurance markets has undergone dramatic growth since its infancy in the early 1960s Our main objective in compiling this volume was to achieve a wider dissemination of key papers in this literature Their significance is highlighted in the introduction which surveys major areas in insurance economics While it was not possible to provide comprehensive coverage of insurance economics in this book these readings provide an essential foundation to those who desire to conduct research and teach in the field In particular we hope that this compilation and our introduction will be useful to graduate students and

to researchers in economics finance and insurance Our criteria for selecting articles included significance representativeness pedagogical value and our desire to include theoretical and empirical work While the focus of the applied papers is on property liability insurance they illustrate issues concepts and methods that are applicable in many areas of insurance The S S Huebner Foundation for Insurance Education at the University of Pennsylvania s Wharton School made this book possible by financing publication costs We are grateful for this assistance and to J David Cummins Executive Director of the Foundation for his efforts and helpful advice on the contents We also wish to thank all of the authors and editors who provided permission to reprint articles and our respective institutions for technical and financial support
