**Real-Time Expert Systems Computer Architecture** R.F. Hodson, 2018-01-17 Expert systems and real time systems technology have been developed independently Expert systems have been successfully implemented in many complex applications traditionally performed by human experts Real time systems have been successfully applied in areas requiring interaction with dynamic environments control and monitoring applications for example Merging these two technologies will yield intelligent systems capable of interacting with complex dynamic environments an area in which human operators exhibit poor productivity due to cognitive overload *VLSI Custom Microelectronics* Stanley L. Hurst, 1998-11-05 Focuses on the design and production of integrated circuits specifically designed for a particular application from original equipment manufacturers The book outlines silicon and GaAs semiconductor fabrication techniques and circuit configurations compares custom design style discusses computer aided design tools and more *Database Machines and Knowledge Base Machines* Masaru Kitsuregawa, Hidehiko Tanaka, 2012-12-06 This volume contains the papers presented at the Fifth International Workshop on Database Machines The papers cover a wide spectrum of topics on Database Machines and Knowledge Base Machines Reports of major projects ECRC MCC and ICOT are included Topics on DBM cover new database machine architectures based on vector processing and hypercube parallel processing VLSI oriented architecture filter processor sorting machine concurrency control mechanism for DBM main memory database interconnection network for DBM and performance evaluation In this workshop much more attention was given to knowledge base management as compared to the previous four workshops Many papers discuss deductive database processing Architectures for semantic network prolog and production system were also proposed We would like to express our deep thanks to all those who contributed to the success of the workshop We would also like to express our appreciation for the valuable suggestions given to us by Prof D K Hsiao Prof D *LogicWorks* Capilano Computing Systems, 1994 An integrated schematic diagram and simulation program which allows students to design and test logic circuits Upwardly compatible with Capilano Computing's DesignWorks professional circuit design system *Introduction to Logic Design* Sajjan G. Shiva, 2018-10-03 The second edition of this text provides an introduction to the analysis and design of digital circuits at a logic instead of electronics level It covers a range of topics from number system theory to asynchronous logic design A solution manual is available to instructors only Requests must be made on official school stationery **LSI Logic Data Book** Texas Instruments Incorporated, **Morphological Image Processing: Architecture and VLSI design** P.P. Jonker, 2012-12-06 Summary Based on the experiences of past designs and the outcome of recent studies in the comparisons of low level image processing architectures a pipelined system for real time low image processing has been designed and realized in CMOS technology To minimize design pitfalls a study was performed to the details of the design solutions that have been found in embodiments of the three main architectural groups of image processing the Square Processor Arrays the Linear Processor Arrays and the Pipelines This is reflected in a theoretical model

As the design is based on bitplane wise processing of images research was performed on the principles of Cellular Logic Processing of two dimensional images of binary A methodology has been developed that is based on the transformation images using sets of Hit or Miss masks This method appeared to be extendable to higher dimensional images A theoretical model for the generation of break point conditions in high dimensional images has been developed and applied up to dimension three

The VHDL Handbook David R. Coelho, 2012-12-06 This book is intended to be a working reference for electronic hardware designers who are interested in writing VHDL models A handbook cookbook approach is taken with many complete examples used to illustrate the features of the VHDL language and to provide insight into how particular classes of hardware devices can be modelled in VHDL It is possible to use these models directly or to adapt them to similar problems with minimal effort This book is not intended to be a complete reference manual for the VHDL language It is possible to begin writing VHDL models with little background in VHDL by copying examples from the book and adapting them to particular problems Some exposure to the VHDL language prior to using this book is recommended The reader is assumed to have a solid hardware design background preferably with some simulation experience For the reader who is interested in getting a complete overview of the VHDL language the following publications are recommended reading An Introduction to VHDL Hardware Description and Design LIP89 IEEE Standard VHDL Language Reference Manual IEEE87 Chip Level Behavioral Modelling ARMS88 Multi Level Simulation of VLSI Systems COEL87 Other references of interest are USG88 DOD88 and CLSI87 Use of the Book If the reader is familiar with VHDL the models described in chapters 3 through 7 can be applied directly to design problems

**Microprogramming and Computer Architecture** Bruce Segee, John Field, 1991 Presents the fundamentals a state machine with an ALU a simple CPU with an 8 bit data bus a bit slice based CPU that allows interrupts bus sharing asynchronous data transfers All circuits are built using real devices with reference made to real data manuals giving the text a more practical slant

*Distributed Computer Control Systems 1986* K.D. Muller, M.G. Rodd, 2014-05-23 This seventh IFAC workshop on distributed control systems DCCS discusses the ideas of real time synchronization and data consistency in industry with emphasis on the Manufacturing Automation Protocol MAP The volume also debates the gulf between the computer scientists approach to language and the needs of the application programmer In addition to treating relevant topics each session has an introductory paper and a panel discussion to give a complete picture of the progress and research in this computer field today
