Me Again And Charlie A Snowy State Of Mind:

Me Again! (and Charlie) Rebecca Stevens, 2003 First person narrative recounting the adventures of twelve year old Janet Fish and her friend Charlie Wells Wild Shot Andy Liebner, 2011-12-21 Wild Shot is outwardly about the external physical demands of the winter sports of Cross Country Skiing and Biathlon Author Andy Liebner discovers that sport is not just about training and competition it s a metaphor for a deeper aspect of life Sport is a quest To rise to the top requires a heroic journey to encounter and overcome external and internal barriers and Andy runs into far more of them than you might think possible The barriers are relentless But he learns that his biggest enemy is inside his head and if he masters his fears then he wins Ever wondered what it would be like to compete at the highest levels of a sport Now imagine doing it without a support system of coaches money or a team This is Andy Liebner s story of how a young guy with a big dream decided to go it on his own against the biggest stars on the skiing and biathlon world circuit While biathlon is not a sport most Americans recognize the Europeans pour money into training facilities gear and athlete development With none of these advantages Andy sets out to train himself and take it to the Europeans on their home turf His inspiration is both familiar and unique While mental and physical training are key for many types of endurance sports the shooting and skiing skills of Biathlon are special The competitions are bare knuckle shoot outs in some of the toughest weather and high mountain terrain Andy s journey is not an easy one and the challenges off the course often seem bigger than those encountered in competition This exciting story couples the high speed twists and turns of a ski run with the human roller coaster of emotion Janet Conway PhD The London Journal: and Weekly Record of Literature, Science, and Art , 1878 **The Smart Set** , 1914 **The Snow Cone Diaries** Juan Valdez, 2014-05-15 The content in this work is fiction fiction in the sense that the main character through which the eyes of this metaphysical and philosophical journey is viewed Charlie is not a real character nor are his counterparts and foils through which he explores various topics such as love the meaning of existence or the origins of the cosmos and how our understanding of these abstract ideas have evolved since the dawn of civilization But like any work of fiction the characters do have some basis in real experience from which of course nothing can be created The intent of the work is to explore the foundations and evolution of knowledge and the boundaries between reason and faith boundaries which from the authors perspective are not quite as clear as some might have us believe And the point of going through the exercise the purpose as it were is not only for the author to come to a better understanding of how all our modern branches of science hang together how they have come to be given their socio political and historical context but also for others to share in his journey and perhaps learn something along the way Since the birth of language and thought even going back thousands of years and even prior to the dawn of civilization itself mankind has attempted to answer two fundamental questions questions that have spurred countless creative forces and branches of thought over the centuries namely who we are and from whence we came The answers to these questions no matter what race religion or creed the seeker might be or

what philosophy or religion they might adhere to are inextricably linked to each other This journey of trying to understand our place in the world and the origins of the universe itself is an ageless quest that in many respects distinguishes mankind from the rest of the creatures on the planet Furthermore this very same quest to answer the same questions fuels not only scientific development but also is the basis for theology and religion both approaching the same set of questions with a different set of tools and with a different mindset but both trying to answer the same set of basic questions as to who we are and how we got here From the authors perspective in order to answer these questions effectively in the Information Age we should have at least some understanding of the history of our answers to these questions as they have evolved over time For we all build our collective knowledge on those that have come before us whether we recognize this or not And in turn that in building this bridge a common metaphor used throughout the work we must leverage the tool of metaphysics a term originally coined by Aristotle but in the context of this work implies a level of abstraction that sits above physics as we understand it in todays world but also provides a conceptual underpinning to all of the branches of knowledge that collectively make up our understanding of the world and our place in it In doing so it is the authors hope that we can not only come to a more complete and fuller understanding of the answers to these basic human questions that have plagued mankind since time immemorial but also at the same time perhaps develop a deeper understanding of the problems of life in the Information Age and how we might best approach them or cope with them in way that not only benefits ourselves as individuals but to society as a whole to which our individual well being depends upon whether or not we recognize it or not
