Me The Cyborg Self And The Networked City:

Me++ William J. Mitchell, 2004-09-17 How the transformation of wireless technology and the creation of an interconnected world are changing our environment and our lives With *Me* the author of *City of Bits* and *e topia* completes an informal trilogy examining the ramifications of information technology in everyday life William Mitchell describes the transformation of wireless technology in the hundred years since Marconi the scaling up of networks and the scaling down of the apparatus for transmission and reception It is he says as if Brobdingnag had been rebooted as Lilliput Marconi's massive mechanism of tower and kerosene engine has been replaced by a palm size cellphone If the operators of Marconi's invention can be seen as human appendages to an immobile machine today's hand held devices can be seen as extensions of the human body This transformation has in turn changed our relationship with our surroundings and with each other The cellphone calls from the collapsing World Trade Center towers and the hijacked jets on September 11 were testimony to the intensity of this new state of continuous electronic engagement Thus Mitchell proposes the trial separation of bits the elementary unit of information and atoms the elementary unit of matter is over With increasing frequency events in physical space reflect events in cyberspace and vice versa digital information can for example direct the movement of an aircraft or a robot arm In *Me* Mitchell examines the effects of wireless linkage global interconnection miniaturization and portability on our bodies our clothing our architecture our cities and our uses of space and time Computer viruses cascading power outages terrorist infiltration of transportation networks and cellphone conversations in the streets are symptoms of a dramatic new urban condition that of ubiquitous inescapable network interconnectivity He argues that a world governed less and less by boundaries and more and more by connections requires us to reimagine and reconstruct our environment and to reconsider the ethical foundations of design engineering and planning practice

Beyond the Networked City

Olivier Coutard, Jonathan Rutherford, 2015-12-14 Cities around the world are undergoing profound changes In this global era we live in a world of rising knowledge economies digital technologies and awareness of environmental issues The so called modern infrastructural ideal of spatially and socially ubiquitous centrally governed infrastructures providing exclusive homogeneous services over extensive areas has been the standard of reference for the provision of basic essential services such as water and energy supply This book argues that after decades of undisputed domination this ideal is being increasingly questioned and that the network ideology that supports it may be waning In order to begin exploring the highly diverse fluid and unstable landscapes emerging beyond the networked city this book identifies dynamics through which a break with previous configurations has been operated and new brittle zones of socio technical controversy through which urban infrastructure and its wider meaning are being negotiated and fought over It uncovers across a diverse set of urban contexts new ways in which processes of urbanization and infrastructure production are being combined with crucial sociopolitical implications through shifting political economies of infrastructure which rework resource distribution and value creation through new

infrastructural spaces and territorialities which rebundle socio technical systems for particular interests and claims and through changing offsets between individual and collective appropriation experience and mobilization of infrastructure With contributions from leading authorities in the field and drawing on theoretical advances and original empirical material this book is a major contribution to an ongoing infrastructural turn in urban studies and will be of interest to all those concerned by the diverse forms and contested outcomes of contemporary urban change across North and South Ecological

Metabolism: In Pursuit of Landscape's Equality in the Urban Realm Carla Novak, 2012-08-27 This book identifies theories of mat urbanism landscape urbanism and void metabolism as conceptual apparatus that can be applied concurrently as a means of reanimating the voids within the contemporary city using an adaptive social ecology It strongly approbates rejuvenation of the city in an adaptive manner adopting flexibility as an important criteria in the future of our cities and utilising landscape to activate and occupy it in new ways that blur the existing boundaries between ecology and architecture The hope is for a cityscape that is open to public interpretation and evolves with the social needs and requirements of the city's inhabitants

, *Throughout* Ulrik Ekman, 2013 Leading media scholars consider the social and cultural changes that come with the contemporary development of ubiquitous computing Ubiquitous computing and our cultural life promise to become completely interwoven technical currents feed into our screen culture of digital television video home computers movies and high resolution advertising displays Technology has become at once larger and smaller mobile and ambient In *Throughout* leading writers on new media including Jay David Bolter Mark Hansen N Katherine Hayles and Lev Manovich take on the crucial challenges that ubiquitous and pervasive computing pose for cultural theory and criticism The thirty four contributing researchers consider the visual sense and sensations of living with a ubicomp culture electronic sounds from the uncanny to the unremarkable the effects of ubicomp on communication including mobility transmateriality and infinite availability general trends and concrete specificities of interaction designs the affectivity in ubicomp experiences including performances context awareness and claims on the real in the use of such terms as augmented reality and mixed reality **Wiring the**

Streets, Surfing the Square Timothy Jachna, 2021-03-18 This book investigates the production of public space in contemporary urban contexts as conditioned by the suffusion of urban life with digital technologies A social production of technology approach is taken to frame the digitally mediated city as a communal social and cultural project Acknowledging the multivalent and shifting nature of public space and the heterogeneity of the urban actors who form it the agency of these different actors in appropriating digital technologies takes center stage The dynamics of negotiations between regimes of control and impulses towards freedom and experimentation the entanglement of the spatial commons and the digital commons changes in the notions of what constitutes membership in a public or counterpublic and evolving relationships between the various individuals and groups who share and constitute public space are all revealed in different actors appropriation of digital technologies in the formation of public spaces and the conducting of public life in cities The book is

divided into two sections Drawing on classic and contemporary scholars on public space and on digital culture Section I explores the implications of the convergence of these bodies of knowledge and lenses of critique and examination on the present urban condition establishing a conceptual foundation upon which public space discourse is brought to bear on an interrogation of the wired or mediated city Structured by the core concepts that underlie Hannah Arendt's notion of agency in the constitution of the public sphere Section II is devoted to discussing and demonstrating through myriad concrete examples how different affordances of digital technologies are implicated in the production of public space and in the interplay between urban governance and control urban life and citizenship and urban commodification The topics in this book are of broad and current international relevance and will appeal to scholars and students in architecture urbanism design sociology and digital culture

The City of Tomorrow Carlo Ratti, Matthew Claudel, 2016-06-28 Since cities emerged ten thousand years ago they have become one of the most impressive artifacts of humanity But their evolution has been anything but linear cities have gone through moments of radical change turning points that redefine their very essence In this book a renowned architect and urban planner who studies the intersection of cities and technology argues that we are in such a moment The authors explain some of the forces behind urban change and offer new visions of the many possibilities for tomorrow's city Pervasive digital systems that layer our cities are transforming urban life The authors provide a front row seat to this change Their work at the MIT Senseable City Laboratory allows experimentation and implementation of a variety of urban initiatives and concepts from assistive condition monitoring bicycles to trash with embedded tracking sensors from mobility to energy from participation to production They call for a new approach to envisioning cities futurecraft a symbiotic development of urban ideas by designers and the public With such participation we can collectively imagine examine choose and shape the most desirable future of our cities

Locating Right to the City in the Global South Tony Samara, Shenjing He, Guo Chen, 2013-01-04 Despite the fact that virtually all urban growth is occurring and will continue to occur in the cities of the Global South the conceptual tools used to study cities are distilled disproportionately from research on the highly developed cities of the Global North With urban inequality widely recognized as central to many of the most pressing challenges facing the world there is a need for a deeper understanding of cities of the South on their own terms Locating Right to the City in the Global South marks an innovative and far reaching effort to document and make sense of urban transformations across a range of cities as well as the conflicts and struggles for social justice these are generating The volume contains empirically rich theoretically informed case studies focused on the social spatial and political dimensions of urban inequality in the Global South Drawing from scholars with extensive fieldwork experience this volume covers sixteen cities in fourteen countries across a belt stretching from Latin America to Africa and the Middle East and into Asia Central to what binds these cities are deeply rooted complex and dynamic processes of social and spatial division that are being actively reproduced These cities are not so much fracturing as they are being divided by governance practices informed by local histories and political contestation and refracted through or infused by market based approaches to urban development Through a close examination of these practices and resistance to them this volume provides perspectives on neoliberalism and right to the city that advance our understanding of urbanism in the Global South In mapping the relationships between space politics and populations the volume draws attention to variations shaped by local circumstances while simultaneously elaborating a distinctive transnational Southern urbanism It provides indepth research on a range of practical and policy oriented issues from housing and slum redevelopment to building democratic cities that include participation by lower income and other marginal groups It will be of interest to students and practitioners alike studying Urban Studies Globalization and Development

Locating Right to the City in the Global South Tony Roshan Samara, Shenjing He, Guo Chen, 2013 Drawing from scholars with extensive fieldwork experience this volume covers sixteen

cities in fourteen countries across a belt stretching from Latin America to Africa and the Middle East and into Asia Central to what binds these cities are deeply rooted complex and dynamic processes of social and spatial division that are being actively reproduced These cities are not so much fracturing as they are being divided by governance practices informed by local histories and political contestation and refracted through or infused by market based approaches to urban development Through a close examination of these practices and resistance to them this volume provides perspectives on neoliberalism and right to the city that advance our understanding of urbanism in the Global South *Critical Marketing* Pauline Maclaran, Michael Saren, Christina Goulding, Richard Elliott, Miriam Caterall, 2012-06-25 Marketing is still widely perceived as simply the creator of wants and needs through selling and advertising and marketing theory has been criticized for not taking a more critical approach to the subject This is because most conventional marketing thinking takes a broadly managerial perspective without reflecting on the wider societal implications of the effects of marketing activities In response this important new book is the first text designed to raise awareness of the critical ethical social and methodological issues facing contemporary marketing Uniquely it provides The latest knowledge based on a series of major seminars in the field The insights of a leading team of international contributors with an interdisciplinary perspective A clear map of the domain of critical marketing A rigorous analysis of the implications for future thinking and research For faculty and upper level students and practitioners in Marketing and those in the related areas of cultural studies and media *Critical Marketing* will be a major addition to the literature and the development of the subject *The Routledge Handbook of Infrastructure Design* Joseph Heathcott, 2022-01-31 *The Routledge Handbook of Infrastructure Design* explores the multifaceted nature of infrastructure through the global lens of architectural history Infrastructure holds the world together Yet even as it connects some people it divides others sorting access and connectivity through varied social categories such as class race gender and citizenship This collection examines themes across broad spans of time raises questions of linkage and scale investigates infrastructure as phenomenon and affect and traces the interrelation of aesthetics technology and power With a diverse range of contributions from 33 scholars this volume presents new research from regions including South and East Asia Sub Saharan Africa South America North America Western Europe the Middle East and the former Soviet Union This extraordinary group of authors bring close attention to the materials functions and aesthetics of infrastructure systems as these unfold within their cultural and political contexts They provide not only new knowledge of specific artifacts such as the Valens Aqueduct the Hong Kong waterfront and the Pan American Highway but also new ways of conceptualizing studying and understanding infrastructure as a worlding process *The Routledge Handbook of Infrastructure Design* provides richly textured thoroughly evidenced and imaginatively drawn arguments that deepen our understanding of the role of infrastructure in creating the world in which we live It is a must read for academics and students **Digital Sociology** K. Orton-Johnson, N. Prior, 2013-01-21 Sociology and our sociological imaginations are having to confront new digital landscapes

spanning mediated social relationships practices and social structures This volume assesses the substantive challenges faced by the discipline as it critically reassesses its position in the digital age

Smart Urbanism Simon Marvin,Andrés Luque-Ayala,Colin McFarlane,2015-12-14 Smart Urbanism SU the rebuilding of cities through the integration of digital technologies with buildings neighbourhoods networked infrastructures and people is being represented as a unique emerging solution to the majority of problems faced by cities today SU discourses enacted by technology companies national governments and supranational agencies alike claim a supremacy of urban digital technologies for managing and controlling infrastructures achieving greater effectiveness in managing service demand and reducing carbon emissions developing greater social interaction and community networks providing new services around health and social care etc Smart urbanism is being represented as the response to almost every facet of the contemporary urban question This book explores this common conception of the problematic of smart urbanism and critically address what new capabilities are being created by whom and with what exclusions how these are being developed and contested where is this happening both within and between cities and with what sorts of social and material consequences The aim of the book is to identify and convene a currently fragmented and disconnected group of researchers commentators developers and users from both within and outside the mainstream SU discourse including several of those that adopt a more critical perspective to assess what problems of the city smartness can address The volume provides the first internationally comparative assessment of SU in cities of the global north and south critically evaluates whether current visions of SU are able to achieve their potential and then identifies alternative trajectories for SU that hold radical promise for reshaping cities
