Meaning Of The 20th Century The Great Transition:

The Meaning of The Twentieth Century Kenneth E. Boulding, 1965 *The Meaning of the Twentieth Century* Kenneth Boulding, 2021-12-30 Originally published in 1965 and written by a noted economist and leader in the field of conflict resolution this book traces the forces which have brought the 20th century post civilisation into being the ever increasing power of science and the scientific attitude the global communication network the high efficiency of industrial societies New conditions pointed to a life of ease but also enormous problems The book discusses how though our technical resources have become immense social and psychological conflicts remain The author's training in psychology and economics combines with a deep sense of history to create a book which is as relevant now as when it was first published the Meaning of the 20th Century Kenneth E. Boulding , 1965 **Cultures of the Future** Magoroh Maruyama, Arthur M. Harkins, 2011-06-15 No detailed description available for Cultures of the Future **AEC Research and Development Report** Atomic Energy Commission, 1969 **"In the End, God"** John AT Robinson, 2011-05-26 Death judgement heaven and hell these are the Four Last Things traditionally linked together under the heading of Eschatology In this book John Robinson examines them all with trenchancy and lucidity providing a new and vital understanding of how these themes relate to contemporary Christian life In the End God identifies a gap that exists in the treatment of eschatology within the Christian faith As Robinson points out eschatology had traditionally dealt with the last things in a way that is remote and removed from everyday life and Christianity and the goal of his book is to make eschatology fully relevant to the modern world Although it is commonly held that eschatology within modern Christianity is centred on the fact and moment of death Robinson shows that the true nature of eschatology is something quite different It is not about the last things after everything else but rather is about the relation of all things to the last things or as it were about the lastness of all things Revealing the foundation of biblical eschatology to be the experience of God by the community of faith Robinson calls readers to embrace the eschatological vision of the Bible but to do so in a way that is alert to its mythic character In the course of these explorations he also lays bare his own theology of universal salvation However contrary to what one may expect this universalism is one that seeks to take both human freedom and the reality of hell with the utmost seriousness This special edition of John A T Robinson's classic text also includes an extended introductory essay by Professor Trevor Hart of the University of St Andrews and an exchange between Robinson and Thomas F Torrance first published in 1949 in the Scottish Journal of Theology

Hope in the Thought of Jacques Ellul Lawrence J.

Terlizzese, 2005-10-30 Hope expresses more than an area of concentration in Ellul s thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our

thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world's embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction
