Destructive Entrepreneurship in Emerging Markets Amir Emami,Esin Yoruk,Andrew Johnston,Andrea Caputo,Paul Jones,2025-03-30 The book investigates the intricate world of entrepreneurship examining its dual nature as a force for constructive societal change as well as a potential source of destructive consequences To examine these two facets in detail the book scrutinizes the interplay between individual actions and institutional frameworks showing how entrepreneurship can drive economic and social progress or hinder it through rent seeking behaviors and exploitation of institutional gaps By analyzing various settings from capitalist to state controlled economies the book highlights the role of the rules of the game in determining whether entrepreneurial activities contribute positively to society or perpetuate inequality and inefficiency As such in the context of emerging markets this book addresses the question of when are entrepreneurial activities constructive and when are they destructive Through a nuanced examination of diverse economic settings and institutional environments the book illuminates how entrepreneurship can foster innovation and social value while also perpetuating corruption and inefficiency By integrating theoretical frameworks with empirical evidence it provides a comprehensive analysis of the factors influencing both productive and destructive entrepreneurial behaviors The aim is to deepen readers understanding of how entrepreneurship interacts with various contexts and to advocate for ethical and socially responsible practices ultimately inviting contemplation on the challenges and opportunities that arise in the evolving landscape of entrepreneurship As such this book is a valuable resource for scholars studying these phenomena but also practitioners and policymakers alike

The Behavioural Environment F.W. Boal,D.N. Livingstone,2003-09-02 Placing human action and perception at the centre of the subject this book considers the effects of mankind on the environment drawing particularly from William Kirk s work on the behavioural environment model Reviewing Kirk s original model in light of recent ideological debate and extensive new evidence this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man s relationship with the ecological environment

A Handbook of Test Construction (Psychology Revivals) Paul Kline,2015-06-03 Psychological tests provide reliable and objective standards by which individuals can be evaluated in education and employment Therefore accurate judgements must depend on the reliability and quality of the tests themselves Originally published in 1986 this handbook by an internationally acknowledged expert provided an introductory and comprehensive treatment of the business of constructing good tests Paul Kline shows how to construct a test and then to check that it is working well Covering most kinds of tests including computer presented tests of the time Rasch scaling and tailored testing this title offers a clear introduction to this complex field a glossary of specialist terms an explanation of the objective of reliability step by step guidance through the statistical procedures a description of the techniques used in constructing and standardizing tests guidelines with examples for writing the test items

computer programs for many of the techniques Although the computer testing will inevitably have moved on students on courses in occupational educational and clinical psychology as well as in psychological testing itself would still find this a valuable source of information guidance and clear explanation

Procrustes Problems John C Gower, Garnt B Dijksterhuis, 2004-01-22 Procrustean methods are used to transform one set of data to represent another set of data as closely as possible The name derives from the Greek myth where Procrustes invited passers by in for a pleasant meal and a night's rest on a magical bed that would exactly fit any guest He then either stretched the guest on the rack or cut off their legs to make them fit perfectly into the bed Theseus turned the tables on Procrustes fatally adjusting him to fit his own bed This text the first monograph on Procrustes methods unifies several strands in the literature and contains much new material It focuses on matching two or more configurations by using orthogonal projection and oblique axes transformations Group average summaries play an important part and links with other group average methods are discussed This is the latest in the well established and authoritative Oxford Statistical Science Series which includes texts and monographs covering many topics of current research interest in pure and applied statistics Each title has an original slant even if the material included is not specifically original The authors are leading researchers and the topics covered will be of interest to all professional statisticians whether they be in industry government department or research institute Other books in the series include 23 W J Krzanowski Principles of multivariate analysis a user's perspective updated edition 24 J Durbin and S J Koopman Time series analysis by State Space Models 25 Peter J Diggle Patrick Heagerty Kung Yee Liang Scott L Zeger Analysis of Longitudinal Data 2 e 26 J K Lindsey Nonlinear Models in Medical Statistics 27 Peter J Green Nils L Hjort Sylvia Richardson Highly Structured Stochastic Systems 28 Margaret S Pepe The Statistical Evaluation of Medical Tests for Classification and Prediction 29 Christopher G Small and Jinfang Wang Numerical Methods for Nonlinear Estimating Equations

The Roots of Metaphor Norman Kreitman, 2019-05-23 First published in 1999 this study begins with a review of basic biological functions stressing the importance to the organism of various kinds of information The biology of information must consider how the brain reacts to new as contrasted with expected inputs these differences are discussed chiefly in relation to language In language processing predictability is of prime importance but to clarify what this entails it is necessary to consider just how our concepts are organized Personal construct theory throws considerable light on this question but is less informative about fantasy which requires separate exploration The main chapter focuses on the origins and interpretation of metaphor in which quite disparate concepts are united but which we understand nevertheless Existing theories of metaphor are unsatisfactory but personal construct theory again helps resolve the psychological linguistic issues Finally the question is raised as to why a good metaphor produces a response which is recognizably aesthetic in character and its implications for our aesthetic responses to other art forms are explored

Personal and Relational Construct Psychotherapy Harry Procter, David A. Winter, 2020-09-17 This book introduces Personal and Relational Construct Psychotherapy a development by the authors of an approach to psychotherapy originated in the 1950 s by George A Kelly Drawing on a lifetime of experience in working with people in mental health settings Procter and Winter focus on the crucial relationships that form the context of human struggles and how these can be a fertile resource in problem resolution The book provides step by step descriptions of assessment and therapeutic methods for working with individuals families and groups as well as exploring the philosophical background of the approach its application to formulation supervision and reflective practice its relationships to other models of psychotherapy and its evidence base The book will be invaluable for psychotherapists counsellors and psychologists of all levels and traditions and useful for students and trainees in health education social work and any field involving helping

people with the difficulties of everyday life **The Physical Environment and Behavior** Joachim F. Wohlwill, Gerald D. Weisman, 2012-12-06 The field of Environment and Behavior This bibliography is aimed at the researcher and advanced student working in the field of environmental psychology as it has come to be designated over the past decade A more appropriate term might be environment behavior studies to suggest the important characteristic of this field as one that transcends the province of the psychologist and brings together workers as well as problems methods and concepts from a great diversity of disciplines and professional fields Among these we may include geography and sociology architecture landscape architecture and planning forestry natural resource management and leisure and recreation research to name only the most important of the diverse fields from which material for this bibliography has been drawn This is in fact one of the primary reasons for our belief in the value of such a volume The literature in the environment behavior field is scattered through the most diverse sources including not only the major periodical and monographic literature in each of the above mentioned disciplines and professions and others as well but also a variety of more specialized publications of varying degrees of accessibility Thus it seemed to us helpful to the researcher teacher and student in this area to bring this far flung literature together in a single volume that might be used as a guide to the field We aimed at a comprehensive treatment including both basic and applied aspects and relations of behavior both to the man made or artificial and to the natural environment **Clinical Assessment, Computerized Methods, and Instrumentation** F.J. Maarse, L.J.M. Mulder, A.N. Brand, A.E. Akkerman, 2006-05-18 A study of clinical assessment computerized methods and instrumentation in psychology containing 18 contributions from the workshop Computers in Psychology held in September 1999 at the University of Utrecht The first section of the work contains contributions concerning clinical assessment Aspects such as short term memory spatial memory counselling skills and play therapy are described as well as computer assisted observational analysis using eye blinks In the second section a series of computer programs supporting decision making in psychotherapy and diagnostics in clinical and other settings is described The last section deals with real time aspects of computers and computer controlled experimental set ups Introduction to the Repertory Grid Interview Martin Fromm, 2004 Although the so called cognitive move in psychology and the development of constructivist approaches of all kinds have changed psychology considerably over the last decades Personal Construct Psychology PCP and the repertory grid technique have preserved the quality of a challenge The grid method today is used in many different fields While applications in the original field of counselling are still important there are a wide range of other applications in medical diagnosis personnel placement and development market research town planning development of knowledge bases and expert systems etc However although the grid method has been accepted and found useful both in PCP and beyond it still remains a method for insiders because in the past it has been difficult to obtain a thorough introduction and supervised training This book is intended to fill the gap It begins with a short introduction to the theoretical background and moves on to discuss typical steps of the grid method before it describes

selected variants While the existing literature is mainly concerned with the analysis of grid data the present book stresses the processes leading up to the collection of data The initial focus is on how meaningful data can be produced In the description and discussion of the process of data collection special attention is given to the typical problems beginners experience experimenting with the grid interview

Managerial, Occupational and Organizational Stress Research 0
Manchester School of Managements,2024-11-01 This title was first published in 2001 A discussion of managerial occupational and organizational stress research The volume is in seven parts The first part explores the theoretical or conceptual frameworks in occupational and organizational stress that have developed out of empirical work and work with others in different countries The second part provides the reader with reviews of literature on different topics in the field of workplace stress Part Three highlights a range of studies undertaken by UMIST and their collaborating colleagues in different institutions The research that highlights issues and problems of current relevance is found in the fourth part while the methodological studies involving instrument development refining of existing measures and more is found in Part Five The studies linking stress and health follows on from this and the new area of investigation evaluating stress management interventions concludes this survey of research in this field
