Fitness is important for all the age for best lifestyle M A Murtoza,2021-05-20

Regular exercise helps to increase immunity promote freedom and reduce disease Sometimes exercise can even help partially reverse the signs of aging It feels good but it is also good for maintaining mental health and memory Whether a person is sick or healthy there are many ways to maintain happiness enhance self confidence and become more energetic You may be trying to start and maintain normal activities as an individual Some groups feel weakened by practical restrictions Or illness some people may be worried about falls or injuries If a person is not used to an activity routine then they may not know where to start Another explanation for mature people who do not practice adequately is that they admit that they are too light or too old which is wrong They seem to be the real motivation to relax or just relax but in fact they are the best motivation to get up and take action Exercise can lower blood pressure Improve mood and help a person maintain overall well being No matter what someone says sports are also fun Exercise is good for everyone regardless of age or mood Not expected to go to the leisure center or do physical exercises The main part of any activity routine is the development of life whether it is trivial or not Everyone should discuss before starting any activity or brainstorming plan Work with your doctor to choose the best plan for your specific needs

**Executive Function(s): Conductor, Orchestra or Symphony? Towards a Trans-Disciplinary Unification of Theory and Practice Across Development, in Normal and Atypical Groups** Lynne A. Barker, Nicholas Morton, 2018-08-30

There are several theories of executive function s that tend to share some theoretical overlap yet are also conceptually distinct each bolstered by empirical data Norman and Shallice 1986 Shallice Stuss and Alexander 2007 Burgess Gilbert Burgess Miyake et al 2000 The notion that executive processes are supervisory and most in demand in novel situations was an early conceptualization of executive function that has been adapted and refined over time Norman Shallice 2001 Burgess Gilbert ii automatic orientation towards stimuli in the environment or internally driven thought Burgess Gilbert iii the automatically generated interface between tacit processes

and strategic conscious thought Barker Andrade Romanowski Morton and Wasti 2006 Morton and Barker 2010 and iv distinct but interrelated executive processes that maintain update and switch across different sources of information Miyake et al 2000 One problem is that executive dysfunction or dysexecutive syndrome Baddeley Eslinger Barker Andrade Andr s Chevnard et al 2000 Cripe 1998 Fortin Godbout Lamberts Evans Barker Morton Morrison McGuire 2011 Complete elimination of environmental confounds runs the risk of generating results that cannot be generalized beyond constrained circumstances of the test environment Barker Andrade Burgess et al 2006 Finally translational issues also confound executive function research across different disciplines psychiatry cognitive science and developmental psychology and across typically developing and clinical populations including Autism Spectrum Disorders Head Injury and Schizophrenia Blakemore Taylor Barker Heavey McHale 2013 Consequently there is a need for unification of executive function approaches across disciplines and populations and narrowing of the conceptual gap between theoretical positions clinical symptoms and measurement

The Art of Latina and Latino Elderhood Katynka Z. Martínez, Mérida M. Rúa, 2022-11-20 It is widely recognized that Latinos are a sizable and diverse population and that we are a young demographic The median age of non Hispanic white Americans is 58 whereas for Latinos it is 30 Footnote1 Perhaps this partially explains the dearth of attention afforded to the topic of aging Latinos by academic scholarship and the mainstream media This special issue compellingly alerts us to the reality that there is a growing aging Latino population about which we know very little and that deserves our attention I am grateful to Katynka Mart nez and M rida R a for curating The Art of Latina and Latino Elderhood since this special issue responds to this significant gap in our knowledge with an exciting set of academic articles and creative contributions that challenges not only our assumptions about Latinos and aging but also our thinking on the types of contributions we include in our journal pages Katynka and M rida make the case that the story of Latino elderhood is best conveyed through a truly multidisciplinary and interdisciplinary approach bringing together public policy humanistic social sciences and artistic interventions So for the first time Latino Studies is pleased to feature a novel in progress a photo essay dial go an artist s monologue and a dialogue among actors alongside more traditional academic articles I think you will agree that this issue before you beautifully conveys why the subject of Latinos and aging should concern all of us and that it will powerfully spur other researchers and artists to take up the invitation to continue to share new evocative stories about the pleasures difficulties and complexities of Latinx later life Previously published in Latino Studies Volume 19 issue 4 December 2021
