*Achieving sustainable production of poultry meat Volume 3* Todd Applegate, 2017-08-31 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030 Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems However more intensive systems have increased the risk of transmission of animal diseases and zoonoses Consumer expectations of sensory and nutritional quality have also never been higher At the same time consumers are more concerned about the environmental impact of poultry production as well as animal welfare Drawing on an international range of expertise this book reviews research on poultry health and welfare Part 1 begins by reviewing the range of diseases and other health issues affecting poultry It then goes on to discuss ways of preventing and managing disease such as breeding and means of attenuating the immune system The second part of the book discusses welfare issues such as management of breeding flocks housing transport and humane slaughter techniques *Achieving sustainable production of poultry meat Volume 3* Health and welfare will be a standard reference for poultry and food scientists in universities government and other research centres and companies involved in poultry production It is accompanied by two further volumes which review safety quality and sustainability as well as poultry breeding and nutrition

**Understanding the behaviour and improving the welfare of chickens** Professor Christine Nicol, 2020-09-29 Very strong focus on key advances in understanding chicken behaviour including sensory perception pain and stress responses learning and cognition as well as social behaviour Coverage of latest wearable video and acoustic technologies to monitor chicken welfare Comprehensive coverage of welfare issues across the value chain from hatcheries to catching transport and slaughter

[Nutrition and the Welfare of Farm Animals](#) Clive J. C. Phillips, 2016-05-12 This book explores the importance of good nutrition in ensuring an adequate standard of welfare for farm animals It is often not realized that farm animals can

suffer when they are fed unsuitable diets which may be because these diets are more economic or the farmer does not know how to rectify poor nutrition This book reveals how to recognize and deal with feeding problems in farm animals when the animal's behaviour is indicating a deficiency through oral stereotypies for example Feeding livestock in emergency situations can present special challenges and the availability of clean and potable water one of the essential components of life can also be an unrecognized problem for many farm animals Feeding farm animals effectively is rarely recognized for the major welfare issue that it is We may assume that animals in intensive husbandry conditions have adequate feed yet it is often too concentrated and designed primarily to immediately maximize production from the animals in the form of growth milk yield or reproduction In extensive rangeland conditions adequate feed supply also cannot be assured potentially leading to undernutrition with serious consequences for the health and even survival of livestock This book will provide a much needed review of the relationships between nutrition and the welfare of farm animals

**Laboratory Animal Welfare** Kathryn Bayne, Patricia V. Turner, 2013-09-02 Laboratory Animal Welfare provides a comprehensive up to date look into the new science of animal welfare within laboratory research Animals specifically considered include rodents cats and dogs nonhuman primates agricultural animals avian animals and aquatic animals The book examines the impact of experiment design and environment on animal welfare as well as emergency situations and euthanasia practices Readers will benefit from a review of regulations and policy guidelines concerning lab animal use as well as information on assessing animal welfare With discussions of the history and ethics of animals in research and a debate on contemporary and international issues this book is a go to resource for laboratory animal welfare

**The Welfare of Domestic Fowl and Other Captive Birds** Ian J. H. Duncan, Penny Hawkins, 2009-12-29 Animal welfare is attracting increasing interest worldwide especially in developed countries where the knowledge and resources are available to at least potentially provide better management systems for farm animals as well as companion zoo and laboratory animals The key requirements for adequate food water a suitable environment appropriate companionship and good health are important for animals kept for all of these purposes There has been increased attention given to farm animal welfare in many countries in recent years This derives largely from the fact that the relentless pursuit of financial reward and efficiency to satisfy market demands has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries In developing countries human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human needs Animal welfare is usually a priority only if it supports the output of the animal be it food work clothing sport or companionship In principle the welfare needs of both humans and animals can be provided for in both developing and developed countries if resources are properly husbanded In reality however the inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in many parts of the world

*Animal Suffering: Philosophy and Culture* E. Aaltola, 2012-07-31 Exploring how animal suffering is made meaningful within Western

ramifications the book investigates themes such as skepticism concerning non human experience cultural roots of compassion and contemporary approaches to animal ethics At its center is the pivotal question What is the moral significance of animal suffering

**The Ethics of Eating Animals** Bob Fischer,2019-09-05 Intensive animal agriculture wrongs many many animals Philosophers have argued on this basis that most people in wealthy Western contexts are morally obligated to avoid animal products This book explains why the author thinks that s mistaken He reaches this negative conclusion by contending that the major arguments for veganism fail they don t establish the right sort of connection between producing and eating animal based foods Moreover if they didn t have this problem then they would have other ones we wouldn t be obliged to abstain from all animal products but to eat strange things instead e g roadkill insects and things left in dumpsters On his view although we have a collective obligation not to farm animals there is no specific diet that most individuals ought to have Nevertheless he does think that some people are obligated to be vegans but that s because they ve joined a movement or formed a practical identity that requires that sacrifice This book argues that there are good reasons to make such a move albeit not ones strong enough to show that everyone must do likewise

**The Encyclopedia of Applied Animal Behaviour and Welfare** D. S. Mills,Jeremy N. Marchant-Forde,2010 The practical focus of this authoritative comprehensive encyclopedia promotes the understanding and improvement of animals behaviour without compromising welfare It will be an essential resource for practising veterinarians researchers and students in zoology and ethology and for all those working with and interested in animals and their welfare Book Jacket

**Alternative Systems for Poultry** Victoria Sandilands,Paul M. Hocking,2012-01-01 Recent interest in how poultry are housed and managed in order to ensure profitability sustainability and good levels of animal welfare are challenging issues that commercial poultry keepers face particularly where legislation is bringing about legal requirements for housing This book compares and contrasts alternative housing with conventional and traditional systems for commercial poultry laying hens meat chickens turkeys waterfowl and gamebirds with regards to welfare disease health nutrition sustainability and genotype environment interaction It is suitable for researchers and students in poultry science

**Poultry Diseases** Mark Pattison,Paul McMullin,Janet M. Bradbury,Dennis Alexander,2007-11-30 Now in its sixth edition Poultry Diseases is once again fully revised with the addition of vital new material It remains the standard reference work on health and disease for those involved in the poultry industry government and veterinary education Following a familiar structure readers of the sixth edition gain concise but major reviews on current knowledge of general and disease specific topics discussed over 45 5 new chapters in seven sections With a large international team of contributors led by an authoritative editor team and a Foreword by Professor Frank Jordan Poultry Diseases is an invaluable resource for the practicing veterinarian poultry inspector agricultural manager or veterinary student Covers common and rarer diseases found in all species of poultry including chickens ducks turkeys game birds and guinea fowl Each chapter outside the General Overview section identifies clearly Epidemiology ClinicalSigns and

Differential Diagnosis Pathogenesis Treatment and Control Systems chapters discuss disorders of selected body systems in detail leading to differential diagnosis of the specific disorder Comprehensive Appendices of Useful Data Glossary of Terms and Lists of diseases specific to Turkeys and Ducks cross referenced to the disease organisms in the main text Worldwide coverage from a recognized international team of editors and contributors 5 new chapters and major chapter revisions on biosecurity in poultry management avian influenza legislation and poultry welfare New contributors and 2 new prominent editors make up a 4 strong editorial team Two color format with over 60 2 colour illustrations highlights key information Viral chapters now include information on zoonoses

Prisoned Chickens, Poisoned Eggs Karen Davis, 2014-01-21 Karen Davis wrote *Prisoned Chickens Poisoned Eggs* in the mid 1990s to focus attention on the billions of chickens buried alive on factory farms The book was a catalyst for animal rights activists seeking to develop effective strategies to expose and relieve the plight of chickens United Poultry Concerns campaign in the 1990s to reveal the U S egg industry's cruel practice of starving hens to force them to molt their feathers and cut the cost of egg production was decisive in shifting advocacy attention to chickens and the hidden causes of Salmonella and Campylobacter food poisoning This new edition documents what has happened since the book first appeared the waging of high profile campaigns to get rid of battery cages for laying hens undercover investigations exposing the appalling cruelty to chickens and turkeys by poultry industry workers globalization of chicken production and its effect on the environment and spread of avian influenza and how farm animal sanctuaries have become key players in debunking industry myths with truthful accounts of the sensitive and intelligent birds being brutalized in the name of food It also effectively explains why these birds are so ill why eating them makes people sick and what can be done to cure the pathology of the modern poultry industry

Index Veterinarius, 2005 *Animal Suffering and Public Relations* Núria Almiron, 2023-08-18 *Animal Suffering and Public Relations* conducts an ethical assessment of public relations mainly persuasive communication and lobbying as deployed by some of the main businesses involved in the animal industrial complex the industries participating in the systematic and institutionalised exploitation of animals Society has been experiencing a growing ethical concern regarding human abuse of other animals This is a trend first promoted by the development of animal ethics which claims any sentient being because of sentience deserves moral consideration and more recently by other approaches from the social sciences including critical animal studies In this volume we aim to start an entirely unaddressed discussion within the field of public relations The need to problematise the ethics of persuasion when nonhuman animal suffering is involved particularly the impact of persuasion and lobbying on compassion towards other animals in the cases of food experimentation entertainment and environmental management This book provides an interdisciplinary theoretical discussion illustrated with international case studies from experts in strategic communication public relations lobbying and advocacy animal ethics philosophy of law political philosophy and social psychology This unique book merges the fields of critical public relations animal ethics and critical animal studies and will be

of direct appeal to a wide range of researchers academics and doctoral students across related fields The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

*Livestock Handling and Transport, 6th Edition* Temple Grandin, 2024-12-04 Edited by world renowned animal scientist Dr Temple Grandin this book integrates scientific research and industry literature on cattle pigs poultry sheep goats deer and horses in both the developed and developing world to provide a practical guide to humane handling and minimizing animal stress Reviewing the latest research on transport systems restraint methods and facilities for farms and slaughterhouses this new edition expands on new developments in the field as well as covering the integration of and potential welfare benefits and costs of technological advances such as virtual fencing An important read for animal scientists animal welfare researchers and practitioners and veterinarians this straightforward text is also a valuable resource for stock people and farmers
