Measuring Racial Discrimination in Bail Decisions David Arnold,Will S. Dobbie,Peter Hull,2020 We develop new quasi experimental tools to measure racial discrimination in the context of bail decisions Observational comparisons of white and black pretrial release rates suffer from omitted variables bias when there are unobserved racial differences in pretrial misconduct potential We show that the bias in these observational comparisons is a function of average white and black misconduct risk which can be estimated from the quasi random assignment of bail judges Estimates from New York City show that less than one third of the release rate disparity between white and black defendants is explained by unobserved differences in misconduct potential with more than two thirds explained by racial discrimination We then develop a hierarchical marginal treatment effects model that imposes additional structure on the quasi experimental variation to investigate the drivers of this discrimination Model estimates show that discrimination in bail decisions is driven by both racial bias and statistical discrimination with the latter coming from a higher level of average risk and less precise risk signals for black defendants

Douglas S. Massey, Nancy A. Denton, 1993 This powerful and disturbing book clearly links persistent poverty among blacks in the United States to the unparalleled degree of deliberate segregation they experience in American cities American Apartheid shows how the black ghetto was created by whites during the first half of the twentieth century in order to isolate growing urban black populations It goes on to show that despite the Fair Housing Act of 1968 segregation is perpetuated today through an interlocking set of individual actions institutional practices and governmental policies In some urban areas the degree of black segregation is so intense and occurs in so many dimensions simultaneously that it amounts to hypersegregation The authors demonstrate that this systematic segregation of African Americans leads inexorably to the creation of underclass communities during periods of economic downturn Under conditions of extreme segregation any increase in the overall rate of black poverty yields a marked increase in the geographic concentration of indigence and the deterioration of social and economic conditions in black communities As ghetto residents adapt to this increasingly harsh environment under a climate of racial isolation they evolve attitudes behaviors and practices that further marginalize their neighborhoods and undermine their chances of success in mainstream American society This book is a sober challenge to those who argue that race is of declining significance in the United States today Housing And Commuting: The Theory Of Urban Residential Structure - A Textbook In Urban Economics John Yinger, 2017-12-21 The field of urban economics is built on an analysis of housing prices land rents housing consumption spatial form and other aspects of urban residential structure Drawing on the journal publications and teaching notes of Professor John Yinger of Syracuse University Housing and Commuting The Theory of Urban Residential Structure presents a simple model of urban residential structure and shows how the model's results change when key assumptions are made more realistic This book provides a wide ranging introduction to research on urban residential structure Topics covered range from theoretical analysis of urban structure with different transportation systems or multiple worksites to empirical work on the impact of local public services on house values and the impact of racial prejudice and discrimination on housing choices Graduate students and scholars who want to learn about research in urban economics will find this book to be a good starting point Closing the Wealth Gap United States. Congress. Senate. Committee on Small Business and Entrepreneurship, 2014 **On the Limits of the Law** Stephen C. Halpern, 1995 On the Limits of the Law is Stephen Halpern's compelling examination of the legal struggle to control the enforcement of Title VI of the 1964 Civil Rights Act the historic provision prohibiting racial discrimination in programs receiving federal financial assistance Although the provision appeared to have immense power to fight racial inequality in education Halpern argues attacking the problem through legal rights and litigation distorted our understanding of educational inequality based on race and limited the remedies used to address it Stephen Halpern has made a substantial and original contribution to the analysis of law and civil rights Concentrating on original or primary sources and including very informative interviews he offers a superb review of the historical and political context of the Civil Rights Act of 1964 and

the United States Supreme Court's desegregation decisions All who are interested in civil rights history and enforcement the administrative process and the role of courts in pursuing racial and social justice will want to read this book Kenneth Tollett
