R. Loftus, E.

F. Loftus, 2019-01-15 Over the past 20 years the study of human memory has become an increasingly popular topic of study for psychologists and since the late 1960s a new framework for studying memory has begun to take shape It is the purpose of this book to present a broad overview of this framework including descriptions of 1 the major theoretical components of the framework and 2 the critical research findings that justify the establishment of these components and illuminate the mechanisms by which they operate The book is not meant to constitute an exhaustive review of the enormous research literature that has accrued over the years The authors deliberately avoid wading into masses of detail on any given topic area and we deliberately sidestep a number of current theoretical controversies Instead this book has been planned to be a guide and an introduction for the student or interested layman with little or no background in the area of memory as a field of psychological inquiry

Dayton Duncan, Ken Burns, 2023-10-10 The epic story of the buffalo in America from prehistoric times to today a moving and beautifully illustrated work of natural history inspired by the PBS series American Buffalo The American buffalo our nation's official mammal is an improbable shaggy beast that has found itself at the center of many of our most mythic and sometimes heartbreaking tales The largest land animals in the Western Hemisphere they are survivors of a mass extinction that erased ancient species that were even larger For nearly 10 000 years they evolved alongside Native people who weaved them into every aspect of daily life relied on them for food clothing and shelter and revered them as equals Newcomers to the continent found the buffalo fascinating at first but in time they came to consider them a hindrance to a young nation's expansion And in the space of only a decade they were slaughtered by the millions for their hides with their carcasses left to rot on the prairies Then teetering on the brink of disappearing from the face of the earth they would be rescued by a motley collection of Americans each of them driven by different and sometimes competing impulses This is the rich and complicated story of a young republic's heedless rush to conquer a continent but also of the dawn of the conservation era a story of America at its very best and worst
