Vasylyv,2020-08-05 In contrast to previous epochs we live in a new ceramic world where advanced ceramics are engineered  
for specific applications This book highlights studies in the fields of fracture mechanics and materials science as promising  
avenues for the quality control of ceramic products It proposes new approaches to solving issues regarding the structural  
integrity of ceramic parts namely techniques of crack initiation and retardation in ceramic parts of arbitrary shapes  
explaining regularities of crack retardation kinetics It also presents a developed technique of high temperature reduction  
oxidation redox treatment of Ni containing cermets for solid oxide fuel cell anodes The book should be useful to mechanical
