Mechanics Of Sediment Transportation And Alluvial Stream Problems:

Mechanics of Sediment Transportation and Alluvial Stream Problems R. J. Garde, K. G. Ranga Raju, 2000 The Third Edition Of This Book Recognises Two Important Developments That Have Taken Place In Recent Years 1 Mathematical Modelling Of Alluvial River Processes And 2 Environmental Aspects Relating To Sedimentation Both Of These Factors Have Been Duly Considered In This Edition With Its Detailed Analysis And Clear Presentation This Book Would Be Extremely Useful For Practising Civil Engineers It Would Also Serve As An Authoritative Reference Source For Graduate And Senior Undergraduate Civil Engineering Students

Mechanics of Sediment Transportation and Alluvial Stream Problems R. J. Garde, K. G. Ranga Raju, 1985 This revised Second Edition features updated information on sediment transport through pipes and the principles of sediment transportation which form the basis for solving alluvial stream problems Discusses such theoretical aspects as properties of sediments incipient motion condition flow regimes resistance to flow bed load transport suspended load and total load transport Also covers applied problems including sediment samplers and sampling stable channels alluvial streams and sediment control

Sharma,Arun

Goel,Pankaj Munjal,2023-05-25 Sustainable development of smart cities infrastructures is of paramount importance and need to be planned designed constructed operated and de commissioned in a manner that ensures economic social environmental and institutional sustainability over the entire infrastructure life cycle Smart cities infrastructure however be cost effective disaster resilient environmentally friendly conserving natural resources and sustainable ensuring faster delivery of quality and durable structures which include roads building bridges energy and water infrastructures Government of India is going to encourage Public Private Partnership PPP as an alternate option to build most of the infrastructures which can be useful both for green field as well as brown field smart cities projects The present book is a collection of contributed research and review papers presented at the National Conference on Sustainable Development of Smart Cities Infrastructure SDSCI 2023 held at National Institute of Technology Kurukshetra in May 2023 The subject matter is grouped into nine sessions which

include research articles pertaining to sustainable development of smart cities urban and rural planning transportation built environment and management sustainable and smart technologies materials construction and maintenance advance modelling characterization of structures energy and environment performance of smart cities infrastructure under extreme loading conditions green buildings structural health monitoring and ICT in smart cities data mining and machine learning for sustainable infrastructure GIS and remote sensing future trends and prospects of smart cities innovative technologies building energy and efficiency and sobriety and sustainable resilience to natural and man made disasters and smart materials etc The book would be a valuable reference for researchers students structural designers site engineers and all related engineers involved in the field of sustainable development of smart cities infrastructure

Applications of Machine Learning in Hydroclimatology Roshan Srivastav,Purna C. Nayak,2024-11-04 Applications of Machine Learning in Hydroclimatology is a comprehensive exploration of the transformative potential of machine learning for addressing critical challenges in water resources management The book explores how artificial intelligence can unravel the complexities of hydrological systems providing researchers and practitioners with cutting edge tools to model predict and manage these systems with greater precision and effectiveness It thoroughly examines the modeling of hydrometeorological extremes such as floods and droughts which are becoming increasingly difficult to predict due to climate change By leveraging AI driven methods to forecast these extremes the book offers innovative approaches that enhance predictive accuracy It emphasizes the importance of analyzing non stationarity and uncertainty in a rapidly evolving climate landscape illustrating how statistical and frequency analyses can improve hydrological forecasts Moreover the book explores the impact of climate change on flood risks drought occurrences and reservoir operations providing insights into how these phenomena affect water resource management To provide practical solutions the book includes case studies that showcase effective mitigation measures for water related challenges These examples highlight the use of machine learning techniques such as deep learning reinforcement learning and statistical downscaling in real world scenarios They demonstrate how artificial intelligence can optimize decision making and resource management while improving our understanding of complex hydrological phenomena By utilizing machine learning architectures tailored to hydrology the book presents physics guided models data driven techniques and hybrid approaches that can be used to address water management issues Ultimately Applications of Machine Learning in Hydroclimatology empowers researchers practitioners and policymakers to harness machine learning for sustainable water management It bridges the gap between advanced AI technologies and hydrological science offering innovative solutions to tackle today s most pressing challenges in water resources
