Mechanisms Of Cell Toxicity Advances In Molecular And Cell Biology:

Advances in Molecular and Cell Biology, 1997 Mechanisms of Cell Toxicity E. Edward Bittar, J. Kevin Chipman, 1997 Cellular toxicology has entered a new era No longer are we concerned only with necrotic cell death produced by severe acute insult often to multiple intracellular targets leading to disruption of the cell membrane New advances in molecular and cellular biology are allowing the dissection of mechanisms of cell death involving more subtle targets within the cell Toxicology has been very important not only in understanding the mechanisms nature and severity of toxicity and thereby helping in risk assessment but toxicology has also played a very important role in helping to understand basic biological processes Historically this has perhaps been most evident in the use of toxic agents to interfere with specific reactions in the body and hence help to dissect out the mechanisms of metabolic processes For example the use of chemical inhibitors was very important in understanding the process of oxidative phosphorylation or the tricarboxylic acid cycle More recent examples are seen herein where toxicology interfaces with for example structural biology in the study of the cytoskeletal components and their interactions Indirectly an understanding of the mechanisms of endogenous protective systems also improves knowledge of basic cell biology Toxic insult and manipulation of cell signalling and control mechanisms in cell growth and differentiation also highlight how important the discipline of cell toxicity has been and will continue to be a major contributor to our understanding of basic issues in the biological and biomedical sciences This book offers selected reviews of some of the principal molecular mechanisms of cell toxicity **Clinical Radiation Oncology E-Book** Leonard L. Advanced Topics on Radiosensitizers of Hypoxic Cells A. Breccia,2012-12-06 In July 1979 the Faculty of Pharmacy of the University of Bologna received a proposal from Professor Breccia to hold an International Conference on Nitroimidazoles Chemistry Pharmacology and Clinical Application Because of the great interest in these drugs in various fields I was very pleased to accept the proposal and to give the conference the sponsorship of the University of Bologna It was an added pleasure to accept the chairmanship of the meeting together with Professors Sensi and Adams At the same time the Minister of Education approved a proposal which also came from the Faculty of Pharmacy to offer an advanced course on the topic Radiosensitizers of Hypoxic Cells This course was subsequently approved by a special Committee of the NATO Scientific Programme as an Advanced Study Institute Since the subject matter of both the conference and the course are closely inter related it was logical to plan the conference as part of the overall course Bringing together specialists from quite different and apparently unrelated fields of research but all with an interest in the study and application of one single group of drugs is a novel idea with intriguing possibilities The volumes of the proceedings include contributions from experts with such diverse interests as synthetic chemistry mechanism of drug action parasitology anaerobic bacteria and protozoa pharmacology and toxicology radiation sensitizers for use in radiotherapy and the development of drugs for use in cancer in general
