Mechanisms In Fibre Carcinogenesis:

Mechanisms in Fibre Carcinogenesis Robert C. Brown, John A. Hoskins, Neil F. Johnson, 2012-12-06 The Editors are sorry that the production of this volume was delayed by the ill health of one of them and we hope that this does not detract from the value of the contents For once this delay is not the fault of any of the authors only the editors are to blame Many of the workers in the field of fibre toxicology became convinced by the middle 1980 s that the worst of the furore over asbestos was over although we were left with an intriguing problem how does asbestos cause disease It was expected that the future impact of fibres on human health would be very small since asbestos exposure would be controlled and there was little chance that man made fibres would prove hazardous These man made fibres are much thicker than asbestos and in most cases they are less durable in the body Both of these properties are believed to make them much less likely to cause disease However many of us had fallen into the habit of calling these materials asbestos substitutes and thus they have acquired a little of the notoriety attached to the natural fibrous minerals Very few of these man made fibres are actually used as replacements for asbestos Asbestos was not suitable for the uses to which the insulation wools are usually put and the ceramic fibres are replacements for fire brick not asbestos which is destroyed at the temperatures at which these materials are used

Mechanisms of Fibre Carcinogenesis A. B. Kane, 1996 The result of a meeting held at IARC early in 1996 this volume provides a thorough and up to date synthesis of the mechanisms of fibre carcinogenesis A consensus document assesses the strengths weaknesses and gaps in the data concerning fibre characterization and genotoxicity fibre related cell proliferation and activation gene expression animal models mixed dust exposure and interactions with other carcinogens The relevance of mechanistic data from in vitro and in vivo assays to the evaluation of fibre carcinogenicity are also discussed Authored review papers also published in this volume provide the background material for much of the discussion

Molecular and Cellular Mechanisms of Toxicity Francesco De Matteis, Lewis L. Smith, 1995-09-25 Written by specialists in their fields this book contains short reviews intended to highlight points of growing interest in mechanistic toxicology The first section considers selected aspects of molecular mechanisms including selectivity of toxic agents and repair processes in the nervous system toxicity of oxygen fibers and aflatoxins The second section discusses the interactions of carcinogens with DNA and other targets and their relevance to both molecular dosimetry of exposure and development of cancer The final part is

concerned with cellular and genetic aspects and includes coverage of some of the most recent and rapidly developing problems in toxicology *Carcinogenicity of Inorganic Substances* J H Duffus,2014-01-31 Focuses on the state of scientific knowledge about the carcinogenicity of metals their compounds and other inorganic substances It provides a valuable guide for chemists involved in risk assessment health and safety and toxicology **Environmental Health Perspectives** ,1993

Current Catalog National Library of Medicine (U.S.),1992-10 **Health Effects of Mineral Dusts** George D. Guthrie, Jr.,Brooke T. Mossman,2018-12-17 Volume 28 of Reviews in Mineralogy provides some of the necessary tools for the researcher interested in this area of interdisciplinary research The chapters present several of the important problems concepts and approaches from both the geological and biological ends of the spectrum These two extremes are partially integrated throughout the book by cross referencing between chapters Chapter 1 also presents a general introduction into the ways in which these two areas overlap However many of the areas ripe for the interdisciplinarian will become obvious after reading the various chapters The final chapter of this book discusses some of the regulatory aspects of minerals Ultimately the regulatory arena is where this type of interdisciplinary approach can make an impact and hopefully better communication between all parties will accomplish this goal A glossary is included at the end of this book because the complexity of scientific terms in the two fields can thwart even the most enthusiastic of individuals This volume represents the proceedings of a course by the same title held at Harbor House Resort and Conference Center on Nantucket Island off the coast of Massachusetts October 22 24 1993 *Malignant Mesothelioma* Harvey I.
