**Constitutional Rights After Globalization** Gavin Anderson, 2005-05-18 Constitutional Rights after Globalization juxtaposes the globalization of the economy and the worldwide spread of constitutional charters of rights The shift of political authority to powerful economic actors entailed by neo liberal globalization challenges the traditional state centred focus of constitutional law Contemporary debate has responded to this challenge in normative terms whether by reinterpreting rights or redirecting their ends e g to reach private actors However globalization undermines the liberal legalist epistemology on which these approaches rest by positing the existence of multiple sites of legal production e g multinational corporations beyond the state This dynamic between globalization and legal pluralism on one side and rights constitutionalism on the other provides the context for addressing the question of rights constitutionalism's counterhegemonic potential This shows first that the interpretive and instrumental assumptions underlying constitutional adjudication are empirically suspect constitutional law tends more to disorder than coherence and frequently is an ineffective tool for social change Instead legal pluralism contends that constitutionalism's importance lies in symbolic terms as a legitimating discourse The competing liberal and new politics of definition the latter highlighting how neoliberal values and institutions constrain political action are contrasted to show how each advances different agenda A comparative survey of constitutionalism's engagement with private power shows that conceiving of constitutions in the predominant liberal legalist mode has broadly favoured hegemonic interests It is concluded that counterhegemonic forms of constitutional discourse cannot be effected within but only by unthinking the dominant liberal legalist paradigm in a manner that takes seriously all exercises of political power

**Public Spaces, Marketplaces, and the Constitution** Anthony Maniscalco, 2015-10-15 Examines how the Supreme Court has banished free expression from shopping malls and other public spaces In spite of their public attractions and millions of visitors most shopping malls are now off limits to free speech and expressive activity The same may be said about many other public spaces and marketplaces in American cities and suburbs

leaving scholars and other observers to wonder where civic engagement is lawfully permitted in the United States In Public Spaces Marketplaces and the Constitution Anthony Maniscalco draws on key legal decisions social theory and urban history to demonstrate that public spaces have been split apart from First Amendment protections while the expression of political ideas has been excluded from privately owned publicly accessible malls Today the traditional indoor suburban shopping mall that icon of modern American capitalism and culture is being replaced by outdoor retail centers Yet the law and courts have been slow to catch up Maniscalco argues that scholars students and the public must confront these innovations in commercial design and consumer practices as well as what they portend for contemporary metropolitan America and its civic spaces

**The Voice of Southern Labor** Vincent J. Roscigno, William F. Danaher, 2004 The 1934 strike of southern textile workers involving nearly 400 000 mill hands remains perhaps the largest collective mobilization of workers in U S history How these workers came together in the face of the powerful and coercive opposition of management and the state is the remarkable story at the center of this book The Voice of Southern Labor chronicles the lives and experiences of southern textile workers and provides a unique perspective on the social cultural and historical forces that came into play when the group struck first in 1929 and then on a massive scale in 1934 The workers grievances solidarity and native radicalism of the time were often reflected in the music they listened to and sang and Vincent J Roscigno and William F Danaher offer an in depth context for understanding this intersection of labor politics and culture The authors show how the message of the southern mill hands spread throughout the region with the advent of radio and the rise of ex mill worker musicians and how their sense of opportunity was further bolstered by Franklin D Roosevelt s radio speeches and policies Vincent J Roscigno is associate professor of sociology at Ohio State University
