Media in Motion Elisabeth Eide,2016-04-29 Owing to increased migration dating from the 1990s Nordic countries have gone through substantial cultural and social changes resulting in increased debate surrounding the politics of multiculturalism One of the central realms of the discussion around multiculturalism in the Nordic region concerns the media which is considered to be a vital factor in the construction of society s values as well as an essential tool in the integration process of migrants providing as it does a symbolic arena for learning about and becoming part of society This collection draws together the latest research from Denmark Finland Norway and Sweden to look at different aspects of the relationship between media and migration in the Nordic region Exploring the role played by the media in nation building and the power of the media in the definition of who belongs in society Media in Motion examines the practices of inclusion and exclusion that characterise mainstream media representations The book also examines the manner in which recent technological changes suggest the emergence of a transnational and cosmopolitan media landscape a space which blurs the boundaries of the national and transnational as well as between the public and the private with significant implications for the ways migrants may take and become part of society As such it will be of interest to those working in the fields of media race and ethnicity colonialism and postcolonial studies and migration

The News Media In National And International Conflict Andrew Arno,Wimal Dissanayake,2019-07-11 Ironically as telecommunications technology the embodiment of modernity advances bringing people in different nations into more direct contact during conflict situations traditional cultural factors become increasingly important as differing ways of thinking and acting collide The mass media can be seen as a factor in the creation of international conflict they also claim many scholars are the key to control and resolution of those problems Whichever side of the coin one chooses to look at mass communication as cause or cure of conflict there is no doubt that the news media are no longer peripheral players on the global scene they are important participants whose organizational patterns of behavior values and motivations must be taken into account in understanding national and international conflict In this volume a distinguished group of authors explores the variety of ways the news media newspapers radio and television are involved in conflict situations Conflicts between the United States and Iran India and Pakistan and the United States and China are examined and national level studies in Sri

Lanka Iran Hong Kong and the United States provide varied contexts in which the authors look at the complex interrelationships among government news media and the public in conflict situations The Message and the Medium - the Future of the News Media in Australia Derek A. Whitelock,1970 The Media in Britain Jeremy Tunstall,1983 British newspapers The Times The Guardian Daily Telegraph and Financial Times have long been considered among the best in the world and the BBC has become the world's most venerated television and radio organization In this book Jeremy Tunstall author of *The Media* are American surveys British media since 1945 including television radio films newspapers and magazines with the purpose of studying how they operate and what the future holds for them In the course of the book he discusses such issues as the relationship of politics to the media media audiences media biases control of the media by conglomerates and policies for the future *America, the Owner's Manual* Bob Graham,Chris Hand,2016-07-15 In 2016 Americans fed up with the political process vented that frustration with their votes Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade Democrats nearly selected a self-described socialist who ran on a populist platform against the influence of big money in politics While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual the truth is that we don't have to pin our hopes for greater participation on any one candidate All of us have a say if we learn master and practice the skills of effective citizenship One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can't fight City Hall That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn't care what people like them thought Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles They describe effective citizenship skills and provide tips from civic experts Even more importantly they offer numerous examples of everyday Americans who have used their skills to make democracy respond The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy By the end of the book you will have new confidence that citizen participation is the lifeblood of America and will be ready to make governments work for you not the other way around **Communications Research in Action** Philip M. Napoli,Minna Aslama,2011-02-01 A synergy between academia and activism has long been a goal of both scholars and advocacy organizations in communications research The essays in *Communications Research in Action* demonstrate for the first time in one volume how an effective partnership between the two can contribute to a more democratic public sphere by helping to break down the digital divide to allow greater access to critical technologies democratizing the corporate ownership of the media industry and offering myriad opportunities for varied articulation of individuals' ideas Essays spanning topics such as the effect of ownership concentration on children's television programming the media's impact on
