Media Advocacy And Public Health Power For Prevention:

Media Advocacy and Public Health, 1993-10-07 Using the media to promote public health is an innovative and valuable approach Media Advocacy and Public Health develops the concept of media advocacy as a central strategy for the prevention of public health problems How we think about health problems and what we do about them is largely determined by how they are reported on television radio and in the newspaper Often crucial issues of public health policy are discussed and decided only after they are made visible by the media A traditional communication strategy like social marketing focuses on giving people a message Media advocacy gives people a voice The first book of its kind Media Advocacy and Public Health lays out the theoretical framework and practical guidelines to successful media advocacy strategies Eight case studies ranging from alcohol to AIDS vividly illustrate how media advocacy has been successfully applied **Evidence-Based Public Health** and Director of the Prevention Research Center Ross C. Brownson Professor of Epidemiology, Elizabeth A. Baker Associate Professor of Behavioral Science and Health Education, Terry L. Leet Assistant Professor of Epidemiology, Missouri Kathleen N. Gillespie Associate Professor of Health Management and Policy All at St. Louis University School of Public Health, 2002-09-19 Ideally public health practitioners always incorporate scientific evidence in making management decisions developing policies and implementing programs In reality however these decisions are often based on short term demands rather than long term study and policies and programs are sometimes developed from anecdotal evidence To enhance evidence based practice this book provides practical guidance on how to choose carry out and evaluate evidence based programs and policies in public health settings It deals not only with finding and using scientific evidence but also with implementing and evaluating interventions that generate new evidence on effectiveness Because all these topics are broad and require multi disciplinary skills and perspectives each chapter covers the basic issues and provides multiple examples to illustrate important concepts The book presents a sequential framework for addressing public health issues that includes developing an initial statement of the issue quantifying the issue searching the scientific literature and organizing information developing and prioritizing program options developing an action plan and implementing interventions and evaluating the program or policy Strategic Media Advocacy for Enforcement of Underage Drinking Laws Phillip M. Wilbur, 1998 **Injury Prevention and Public Health** Tom Christoffel, Susan Scavo Gallagher, 2006 Health Behavior Education Promotion Public Health Communication Interventions Nurit Guttman, 2000-04-15 The ethical dimensions of health communicators interventions and campaigns are brought into question in this thought provoking book Examining the efforts to effect behavior change the author questions how far health communication can and should go in changing people's values The author broadens the current analysis of interventions and presents conceptual frameworks that help identify values and justifications that are embedded in health communication goals strategies and evaluation criteria This critical approach helps explain how and why choices are made in design and implementation and provides constructs and

frameworks to examine them It also widens the criteria for program evaluation and policymaking and provides practitioners planners policy makers researchers and students with practice oriented questions Public Relations for Public Health and Social Good Brooke W. McKeever, 2024-07-25 Foregrounding the work professional communicators do to support public health and social missions this book examines how the principles and practices of public relations can be applied by nonprofit government and corporate entities working to understand and improve public health and social conditions Many organizations attempt to influence prosocial behaviors such as donating one's time money or talents participating in advocacy or activism or otherwise working to protect public health or inspire social change This book explores research and practice related to communication and other factors involved in motivating such efforts Each chapter focuses on a different topic providing definitions summarizing research and explaining how it has been or can be applied to practice and ends with discussion questions to consider and references for further reading Ideally placed for advanced undergraduate and graduate courses in public relations health communication or strategic communication as well as for communications professionals looking to apply research to their practice Encyclopedia of Evidence in Pharmaceutical Public Health and Health Services Research in Pharmacy, 2023-10-14 This encyclopedia covers the definitions concepts methods theories and application of evidence based pharmaceutical public health and health services research It highlights why and how this field has a significant impact on healthcare The work aims to synthesize baseline knowledge as well as the latest and cutting edge research based information The encyclopedia collates information on public health health services research evidence based pharmacy practice and its impacts on patients decision makers and consumers This reference work discusses all aspects of policy and practice decisions on medicines use access and pharmacy services by covering broad aspects related to pharmacy practice public health and health services research The aim is to develop high quality content which will be a must read and be used as a reference source at all pharmacy and medical schools in the world The health services research investigates the impact of social factors organizational policies financing systems medical technologies and personal influence on access quality and cost of healthcare concerning the quality of life of the patients This reference work fundamentally promotes the evidence based evaluation of healthcare services and thus will improve the better access and delivery of healthcare services Also pharmacy medical and health services students and researchers need a broad understanding of pharmaceutical public health evidence based approaches to delivering care changing professional and patient behavior and undertaking research in these areas In general there is a need to build research capacity and capability in the pharmacy profession

ICT4D Information Communication Technology for Development Parveen Pannu, Yuki Azaad Tomar, 2010

The present book discusses how digital revolution can be used effectively for development. Every sector is involved: governments, academia, small and large businesses, large corporations, inter-governmental organizations, and non-profits and non-governmental organizations. ICTs can be a useful tool to support existing and new development activities. The book highlights the range of electronic technologies and techniques which are used to manage information and knowledge; it includes the old ICTs of radio, television, and telephone, and the new ICTs of computers, satellite, and wireless technology, and the internet. Spread in twenty-five chapters, the book combines conceptual framework with practical guidance, explaining the different ICTs. It focuses on disseminating the theoretical and the practical knowledge about the old and new ICTs and using the specialized knowledge for development. The book aims to highlight the role of ICTs to empower people with skills related to media technology, journalism, and an ability to make decisions regarding convergence of ICTs, enabling them to improve their living standards and quality of life. Useful for the students of Communication and Extension, Journalism, Mass Media, Home Science, Social Work, etc.

Stochastic Processes on a Lattice and Gibbs Measures Bernard Prum, Jean Claude Fort, 1990-12-31

In many domains one encounters systems of interacting elements: elements that interact more forcefully the closer they may be. The historical example upon which the theory offered in this book is based is that of magnetization, as it is described by the Ising model. At the vertices of a regular lattice of sites, atoms choose an orientation under the influence of the orientations of the neighboring atoms. But other examples are known in physics: the theories of gases, fluids, and in biology, cells are increasingly likely to become malignant when their neighboring cells are malignant, or in medicine, the spread of contagious diseases, geogenetics, even in the social sciences, spread of behavioral traits within a population. Beyond the spatial aspect that is related to the idea of neighboring sites, the models for all these phenomena exhibit three common features: The unavoidable ignorance about the totality of the phenomenon that is being studied and the presence of a great number of often unsuspected factors that are always unquantified lead inevitably to stochastic models. The concept of accident is very often inherent to the very nature of the phenomena considered, so to justify this procedure one has recourse to the physicist's principle of indeterminacy, or for example to the factor of chance in the Mendelian genetics of phenotypes.
