Encyclopedia of Information Science and Technology, Third Edition Khosrow-Pour, D.B.A., Mehdi,2014-07-31 This 10 volume compilation of authoritative research based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities prospective solutions and future directions in the field of information science and technology Provided by publisher **Digital Media and Social Connection in the Lives of Children, Adolescents and Families** Yalda Uhls,Kaveri Subrahmanyam,Amanda Third,2022-11-29 *[Populism, Media and Education](#)* Maria Ranieri,2016-01-22 Based on a major research project funded by the European Commission Populism Media and Education studies how discriminatory stereotypes are built online with a particular focus on right wing populism Globalization and migration have led to a new era of populism and racism in Western countries rekindling traditional forms of discrimination through innovative means New

media platforms are being seen by populist organizations as a method to promote hate speech and unprecedented forms of proselytism. Race, gender, disability and sexual orientation are all being used to discriminate and young people are the preferred target for populist organizations and movements. This book examines how media education can help to deconstruct such hate speech and promote young people's full participation in media saturated societies. Drawing on rich examples from Austria, Belgium, Bulgaria, France, Italy, Slovenia and the UK, countries characterized by different political and cultural contexts, Populism, Media and Education addresses key questions about the meaning of new populism, the nature of engagement and the role of education and citizenship in the digital century. With its international and interdisciplinary approach, this book is essential reading for academics and students in the areas of education, media studies, sociology, cultural studies, political sciences, discrimination and gender studies.

Digital Literacies for Learning Allan Martin, Dan Madigan, 2006

In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged and new literacies including information literacy and IT literacy need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky provides the foreword. The book is in two parts. In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners and how these literacies are being relocated in a more student centred environment within the broader perspective of learning Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.
