Social Control and Self-Control Theories of Crime and Deviance L. Edward Wells, 2017-07-05 Control theories have dominated criminological theory and research since the 1969 publication of Hirschi's seminal work on the social bond Social control and self control theorists are unique in suggesting that patterns in criminal behaviors are better explained by variations in social constraints rather than by individual motivational impulses thus indicating that their main concerns are the explication and clarification of the techniques processes and institutions of informal social control The four major sections of this volume focus on the similarities and differences among the major contributors to the early developmental stage of social control theory the central importance of parents peers and schools in the creation of informal control mechanisms and their link to crime and delinquency the theoretical underpinnings of self control theory including empirical tests and criticisms and theoretical integrations of social control and self control theories with various motivational theories of crime and delinquency *The Oxford Handbook of Environmental Criminology* Gerben J.N. Bruinsma, Shane D. Johnson, 2018-02-08 The study of how the environment local geography and physical locations influence crime has a long history that stretches across many research traditions These include the neighborhood effects approach developed in the 1920s the criminology of place and a newer approach that attends to the perception of crime in communities Aided by new technologies and improved data reporting in recent decades research in environmental criminology has developed rapidly within each of these approaches Yet research in the subfield remains fragmented and competing theories are rarely examined together The Oxford Handbook of Environmental Criminology takes a unique approach and synthesizes the contributions of existing methods to better integrate the subfield as a whole Gerben J N Bruinsma and Shane D Johnson have assembled a cast of top scholars to provide an in depth source for understanding how and why physical setting can influence

the emergence of crime affect the environment and impact individual or group behavior The contributors address how changes in the environment global connectivity and technology provide more criminal opportunities and new ways of committing old crimes They also explore how crimes committed in countries with distinct cultural practices like China and West Africa might lead to different spatial patterns of crime This is a state of the art compendium on environmental criminology that reflects the diverse research and theory developed across the western world Place Matters David Weisburd, John E. Eck, Anthony A. Braga, Cody W. Telep, Breanne Cave, Kate Bowers, Gerben Bruinsma, Charlotte Gill, Elizabeth R. Groff, Julie Hibdon, Joshua C. Hinkle, Shane D. Johnson, Brian Lawton, Cynthia Lum, Jerry H. Ratcliffe, George Rengert, Travis Taniguchi, Sue-Ming Yang, 2016-04-04 Over the last two decades there has been increased interest in the distribution of crime and other antisocial behavior at lower levels of geography The focus on micro geography and its contribution to the understanding and prevention of crime has been called the criminology of place It pushes scholars to examine small geographic areas within cities often as small as addresses or street segments for their contribution to crime Here the authors describe what is known about crime and place providing the most up to date and comprehensive review available Place Matters shows that the study of criminology of place should be a central focus of criminology in the twenty first century It creates a tremendous opportunity for advancing our understanding of crime and for addressing it The book brings together eighteen top scholars in criminology and place to provide comprehensive research expanding across different themes
