New Directions in Latin American Architecture Francisco Bullrich, 1969 Met bibliografie en register **New Dircions in Latin American Architecture**, 1969 **Latin American Modern Architectures** Patricio del Real, Helen Gyger, 2013-06-03 Latin American Modern Architectures Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region's rich and varied architecture. It will also introduce you to major projects that have not been written about in English. A foreword by historian Kenneth Frampton sets the stage for essays on well-known architects such as Lucio Costa and Félix Candela which will show you unfamiliar aspects of their work and for essays on the work of little-known figures such as Uruguayan architect Carlos Gómez Gavazzo and Peruvian architect and politician Fernando Belaúnde Terry. Covering urban and territorial histories from the nineteenth and twentieth centuries along with detailed building analyses, this book is your best source for historical and critical essays on a sampling of Latin America's diverse architecture providing much-needed information on key case studies. Contributors include Noem Adagio, Pedro Ignacio Alonso, Luis Castañeda Viviana, d'Auria, George F. Flaherty, María González Pons, Cristina López Uribe, Hugo Mondragón, López Jorge, Nudelman, Blejwas, Hugo, Palmarola, Sagredo, Gaia, Piccarolo, Claudia, Shmidt, Daniel, Talesnik, and Paulo Tavares. Building the New World Valerie Fraser, 2000. Brasília, Caracas, Mexico City, Rio de Janeiro, cities synonymous with some of the most innovative and progressive architecture of the past century. **Modern Architecture in Latin America** Luis E. Carranza, Fernando Luiz Lara, 2015-01-05. Modern Architecture in Latin America: Art, Technology, and Utopia is an introductory text on the issues, polemics, and works that represent the complex processes of political, economic, and cultural modernization in the twentieth century. The number and types of projects varied greatly from country to country, but as a whole, the region produced a significant body of architecture that has never before been presented in a single volume in any language. Modern Architecture in Latin America is the first comprehensive history of this important production. Designed as a survey and focused on key examples, paradigms arranged chronologically from 1903 to 2003, this volume covers a myriad of countries, historical, social, and political conditions, and projects, developments that range from small houses to urban plans to architectural movements. The book is structured so that it can be read in a variety of ways: as a historically developed narrative of modern architecture in Latin America; as a country-specific chronology; or as a treatment of traditions centered on issues of art, technology, or utopia. This structure allows readers to see the development of multiple and parallel branches, historical strands of architecture, and at times their interconnections across countries. The authors provide a critical evaluation of the movements presented in relationship to their overall goals and architectural transformations. **The Cambridge History of Latin America** Leslie Bethell, 1984. This volume looks at Latin American history from c. 1870 to 1930. **Modernity and the Architecture of Mexico** Edward R. Burian, 2010-06-28. Since the mid-1970s, there has been an extraordinary renewal of interest in early modern architecture, both as a way of gaining insight into contemporary

architectural culture and as a reaction to neoconservative postmodernism This book undertakes a critical reappraisal of the notion of modernity in Mexican architecture and its influence on a generation of Mexican architects whose works spanned the 1920s through the 1960s Nine essays by noted architects and architectural historians cover a range of topics from broad based critical commentaries to discussions of individual architects and buildings Among the latter are the architects Enrique del Moral Juan O Gorman Carlos Obregón Santacilia Juan Segura Mario Pani and the campus and stadium of the Ciudad Universitaria in Mexico City Relatively little has been published in English regarding this era in Mexican architecture Thus *Modernity and the Architecture of Mexico* will play a groundbreaking role in making the underlying assumptions ideological and political constructs and specific architect's agendas known to a wide audience in the humanities Likewise it should inspire greater appreciation for this undervalued body of works as an important contribution to the modern movement
