A Timeless Place Julia Harrison, 2013-09 As Julia Harrison s first summer living in Ontario approached she became aware of the culture of the cottage While friends and family talked of nothing but languid afternoons on the dock and bartered for as many lakeside days as possible Harrison marveled at the less attractive components of cottage life the clogged highways en route and the unrelenting investment of money and labour that the idyllic escapes demanded Curious about the rich and passionate meaning these places seemed to hold

Harrison studied cottagers in the Haliburton region over the course of seven years Thoughtfully and engagingly written *A Timeless Place* considers the cottage family as a place where memories are treasured national identity is celebrated spiritual balance is restored and even a few dark secrets are kept Health Care Economics John B. Davis, Robert McMaster, 2017-06-01 The analytical approach of standard health economics has so far failed to sufficiently account for the nature of care This has important ramifications for the analysis and valuation of care and therefore for the pattern of health and medical care provision This book sets out an alternative approach which places care at the center of an economics of health showing how essential it is that care is appropriately recognized in policy as a means of enhancing the dignity of the individual Whereas traditional health economics has tended to eschew value issues this book embraces them introducing care as a normative element at the center of theoretical analysis Drawing upon care theory from feminist works philosophy nursing and medicine and political economy the authors develop a health care economics with a moral basis in health care systems In providing deeper insights into the nature of care and caring this book seeks to redress the shortcomings of the standard approach and contribute to the development of a more person based approach to health and medical care in economics *Health Care Economics* will be of interest to researchers and postgraduate students in health economics heterodox economists and those interested in health and medical care *Dimensions of Human Behavior* Elizabeth D. the social environment Carla Mueller Lindenwood University *Modern Couples Sharing Money, Sharing Life* Janet Stocks, Björn Halleröd, 2007-07-12 This collection is the result of a five year long collaboration of sociologists in Sweden Spain and the United States In depth extended interviews with couples explore their daily lives and provide insights into the impact of modernity gender roles and expectations of the meaning of money and the complex financial reality of households

Ethnographic Inquiry and Lived Experience Wing-Chung Ho, 2019-01-15 Ho addresses two fundamental theoretical questions about how best to practice ethnographic inquiries to obtain qualitative experience near and shareable accounts of human living The first question is regarding the epistemology of ethnography Ho posits that writing is epistemologically prior to the researcher s fieldwork experience in the production of ethnographic knowledge This stance is developed using the theories of hermeneutics put forward by Paul Ricoeur and Hans Georg Gadamer who both consider that once a text is produced its meaning is dissociated from the intention of the author The second question is what is the putative object that the ethnographer writes about Ho argues that lived experience *Erlebnis* offers such an ethnographic object Since the lived experience that an ethnographer experiences during fieldwork cannot be studied directly further theorizations of lived experience are necessary Ho underscores both the non discursivity and transcendence of lived experience in the lifeworld and the way power is clandestinely imbued in everyday life in shaping subjectivity and practice This theorization brings together Alfred Schutz s lifeworld theory and Michel Foucault s power knowledge nexus The result is a general theory of experience that is pertinent for ethnographic inquiries By addressing these two fundamental questions and offering novel angles from which to answer them this book offers refreshed epistemological guidelines for conducting ethnographic research for scientific reasoning More importantly this book also provides a crucial knowledge base for comprehending the current epistemological debates inherent in the production of ethnographic knowledge and furthering discussions in the field
