Revise for Edexcel GCSE Mathematics P. Ledger, 2002 Intending to help students revise the key topics they need to brush up on this work includes test yourself diagnostic questions worked examples practice questions and summaries on important topics and practice examination papers

GCSE Maths David Bowles, Paul Metcalf, 2002 Written specifically for the Foundation and Intermediate tier GCSE for the AQA Modular GCSE Specification B This clearly presented book will help all students looking to achieve a grade C in GCSE maths An ideal stand alone resource for students doing the GCSE course in one year including students resitting modules

Towards Gender Equity in Mathematics Education Gila

Hanna,2006-04-11 THE REAL WORLD OF MATHEMATICS SCIENCE AND TECHNOLOGY EDUCATION In this Preface I would like to focus on what I mean by education and speak about the models and metaphors that are used when people talk write and act in the domain of education We need to look at the assumptions and processes that the models and metaphors implicitly and explicitly contain I feel we should explore whether there is a specific thrust to mathematics education in the here and now and be very practical about it For me education is the enhancement of knowledge and understanding and there is a strong and unbreakable link between the two There seems little point in acquiring knowledge without understanding its meaning Nor is it enough to gain a deep understanding of problems without gaining the appropriate knowledge to work for their solution Thus knowledge and understanding are each necessary conditions for the process of education but only when they are linked will the process bear fruit Only in the balanced interplay of knowledge and understanding can we expect to achieve genuine education **Teaching Mathematics** Pamela Cowan,2006-02-13 A practical introduction to Maths teaching designed specifically for beginning teachers in primary and secondary schools It brings together the latest DfES and TTA guidelines and requirements with authoritative guidance ensuring that readers feel confident about how to approach their role as a teacher This book explores key issues in maths teaching today including planning and classroom management assessment recording and reporting information and communication technology investigative mathematics equal opportunities special needs and differentiation key skills and alternative mathematics qualifications being an effective maths teacher personal and professional development in the early stages of a teaching career Art, Education and Gender Gill Hopper,2015-10-05 Why do girls study art and why do girls become primary teachers This book examines and reveals the powerful influence of the family the school and the state in shaping female identity and constructing notions of gender appropriateness It also discusses the status of art at school and the position of women artists in society
