Antiquity and Beyond Maria Gerolemou, 2018-04-23 In recent years scholars have extensively explored the function of the miraculous and wondrous in ancient narratives mostly pondering on how ancient authors view wondrous accounts i e the treatment of the descriptions of wondrous occurrences as true events or their use More precisely these narratives investigate whether the wondrous pursues a display of erudition or merely provides stylistic variety sometimes such narratives even represent the wish of the author to grant a rational explanation to extraordinary actions At present however two aspects of the topic have not been fully examined a the ability of the wondrous miraculous to set cognitive mechanisms in motion and b

the power of the wondrous miraculous to contribute to the construction of an authorial identity that of kings gods or narrators To this extent the volume approaches miracles and wonders as counter intuitive phenomena beyond cognitive grasp which challenge the authenticity of human experience and knowledge and push forward the frontiers of intellectual and aesthetic experience Some of the articles of the volume examine miracles on the basis of bewilderment that could lead to new factual knowledge the supernatural is here registered as something natural although strange the rest of the articles treat miracles as an endpoint where human knowledge stops and the unknown divine begins here the supernatural is confirmed Thence questions like whether the experience of a miracle or wonder as a counter intuitive phenomenon could be part of long term memory i e if miracles could be transformed into solid knowledge and what mental functions are encompassed in this process are central in the discussion

The Greek Hoplite Phalanx Richard Taylor, 2021-12-22 The Greek hoplite and the phalanx formation in which he fought have been the subject of considerable academic debate over the past century Dr Richard Taylor provides an overview of the current state of play in the hoplite debate in all its aspects from fighting techniques to the social and economic background of the hoplite revolution in a form that is accessible for the general reader and military history enthusiast But the book goes further offering a new perspective on the hoplite phalanx by putting it in the context of other military developments in the Mediterranean world in the middle of the first millennium BC

He argues that the Greek phalanx was different in degree but not in kind from other contemporary heavy infantry formations and that the hoplite debate with its insistence on the unique nature of the hoplite phalanx has obscured the similarities with other equivalent formations The result is a fresh take on a perennially popular subject

Experiencing Dodona Diego Chapinal-Heras, 2021-03-08 A monograph concerning the sanctuary of Dodona and its role in the political context of Epirus might be a remarkable input Located in a region that has received more interest in the last years this book attempts to analyze the way the shrine evolved in connection with the political developments of its surrounding region The study employs a diachronic perspective and emphasizes throughout that religion was a dynamic not a static phenomenon The chronology of this research extends from the Archaic to Hellenistic periods Its key novelty is that it offers an entirely new holistic approach to an ancient religious site by considering its polyfunctionality At the same time that it presents a state of the art analysis of the shrine of Dodona and contributes with a new theory concerning the function of some structures located in the sacred area it also highlights the close connection between a settlement and its region For this reason the aim is to become a reference work that allows continuing the current trend of studies focused on Epirus a territory traditionally considered as secondary

Around the Hearth J  r  my Lamaze, Maguelone Bastide, 2021-09-07 From basic needs such as lighting heating or cooking to symbolic or ritual engagement hearths in indoor contexts serve as a focal point This is especially evident both spatially and architecturally in structures containing central hearths In assessing any gathering around a hearth the types of social groups involved need to be determined and their interactions clearly assessed in each specific case Beyond clearly domestic contexts many rooms or buildings have been deemed religious or cultic places often based solely on the presence of a hearth despite other possible interpretations This volume appraises and contextualises diversity in practice centering on the hearth in the Aegean and more widely in areas of the Western Mediterranean closely connected to Greek civilization notably through its colonies revealing surprising similarities but also local adaptations In the West the use of the hearth often has a unique character arising from local adaptations born of indigenous practices The combined approach presented here detailing technical aspects of the hearths themselves their architectural settings and any associated artefacts or furnishings affords a rich spectrum for cross cultural analysis between these Mediterranean regions
