New Deal In The Urban South:

The Making of Urban America Raymond A. Mohl, Roger Biles, 2023-10-03 The revised and updated third edition of *The Making of Urban America* includes seven new articles and a richly detailed historiographical essay that discusses the vast urban history literature added to the canon since the publication of the second edition. The authors extensively revised introductions and the fifteen reprinted articles trace urban development from the preindustrial city to the twentieth century city. With emphasis on the social, economic, political, commercial, and cultural aspects of urban history, these essays illustrate the growth and change that created modern day urban life. Dynamic topics such as technology, immigration, and ethnicity, suburbanization, sunbelt cities, urban political history, and planning and housing are examined. *The Making of Urban America* is the only reader available that covers all of U.S. urban history and that also includes the most recent interpretive scholarship on the subject.

Urban Policy in Twentieth-century America Arnold Richard Hirsch, Raymond A. Mohl, 1993 The recent riots in Los Angeles brought the urban crisis back to the center of public policy debates in Washington D.C. and in urban areas throughout the United States. The contributors to this volume examine the major policy issues: race, housing, transportation, poverty, the changing environment, the effects of the global economy, confronting contemporary American cities. Raymond A. Mohl begins with an extended discussion of the origins, evolution, and current state of Federal involvement in urban centers. Michael B. Katz follows with an insightful look at poverty in turn of the century New York and the attempts to ameliorate the desperate plight of the poor during this period of rapid economic growth. Arnold R. Hirsch, Mohl, and David R. Goldfield then pursue different facets of the racial dilemma confronting American cities. Hirsch discusses historical dimensions of residential segregation and public policy, while Mohl uses Overtown, Miami, as a case study of the social impact of the construction of interstate highways in urban communities. David Goldfield explores the political ramifications and incongruities of contemporary urban race relations. Finally, Carl Abbott and Sam Bass Warner Jr. examine the impact of global economic developments and the environmental implications of past policy choices. Collectively, the authors show us where we have been, some of the needs that must be addressed, and the urban policy alternatives we face.

The Evolution of American Urban Society Howard P. Chudacoff, Judith Smith, Peter Baldwin, 2016-05-23 This interesting and informative book shows how different groups of urban residents with different social, economic, and political power cope with the urban environment, struggle to make a living, participate in communal institutions, and influence the direction of cities and urban life. An absorbing book, *The Evolution of American Urban Society* surveys the dynamics of American urbanization from the sixteenth century to the present, skillfully blending historical perspectives on society, economics, politics, and policy, and focusing on the ways in which diverse peoples have inhabited and interacted in cities. Key topics: Broad coverage includes the Colonial Age, commercialization, and urban expansion; life in the walking city; industrialization, newcomers, city politics, the social and physical environment; the 1920s and 1930s; the growth of suburbanization; and the future of modern cities. Historical Roots of the Urban Crisis Henry L. Taylor Jr., Walter Hill, 2013-06-17 This collection of 12 new essays will tell the story of how the gradual transformation of industrial society into service driven postindustrial society affected black life and culture in the city between 1900 and 1950 and it will shed light on the development of those forces that wreaked havoc in the lives of African Americans in the succeeding epoch The book will examine the black urban experience in the northern southern and western regions of the U S and will be thematically organized around the themes of work community city building and protest the analytic focus will be on the efforts of African Americans to find work and build communities in a constantly changing economy and urban environments tinged with racism hostility and the notions of white supremacy Some chapters will be based on original research while others will represent a synthesis of existing literature on that topic

Race and the Shaping of Twentieth-Century Atlanta Ronald H. Bayor, 2000-11-09 Atlanta is often cited as a prime example of a progressive New South metropolis in which blacks and whites have forged a city too busy to hate But Ronald Bayor argues that the city continues to bear the indelible mark of racial bias Offering the first comprehensive history of Atlanta race relations he discusses the impact of race on the physical and institutional development of the city from the end of the Civil War through the mayorship of Andrew Young in the 1980s Bayor shows the extent of inequality investigates the gap between rhetoric and reality and presents a fresh analysis of the legacy of segregation and race relations for the American urban environment Bayor explores frequently ignored public policy issues through the lens of race including hospital care highway placement and development police and fire services schools and park use as well as housing patterns and employment He finds that racial concerns profoundly shaped Atlanta as they did other American cities Drawing on oral interviews and written records Bayor traces how Atlanta's black leaders and their community have responded to the impact of race on local urban development By bringing long term urban development into a discussion of race Bayor provides an element missing in usual analyses of cities and race relations

A Public Charity Mary L. Mapes, 2004-10-19 Using Indianapolis as its focus this book explores the relationship between religion and social welfare Arising out of the Indianapolis Polis Center's Lilly sponsored study of religion and urban culture the book looks at three issues the role of religious social services within Indianapolis's larger social welfare support system both public and private the evolution of the relationship between public and private welfare sectors and how ideas about citizenship mediated the delivery of social services Noting that religious nonprofits do not figure prominently in most studies of welfare Mapes explores the historical roots of the relationship between religiously affiliated social welfare and public agencies Her approach recognizes that local variation has been a defining feature of American social welfare *A Public Charity* aims to illuminate local trends and to relate the situation in Indianapolis to national trends and events Polis Center Series on Religion and Urban Culture David J Bodenhamer and Arthur E Farnsley II editors

The First Texas News Barons Patrick L.

Cox, 2009-04-20 Newspaper publishers played a crucial role in transforming Texas into a modern state. By promoting expanded industrialization and urbanization as well as a more modern image of Texas as a southwestern rather than southern state, news barons in the early decades of the twentieth century laid the groundwork for the enormous economic growth and social changes that followed World War II. Yet their contribution to the modernization of Texas is largely unrecognized. This book investigates how newspaper owners such as A. H. Belo and George B. Dealey of the Dallas Morning News, Edwin Kiest of the Dallas Times Herald, William P. Hobby and Oveta Culp Hobby of the Houston Post, Jesse H. Jones and Marcellus Foster of the Houston Chronicle, and Amon G. Carter Sr. of the Fort Worth Star-Telegram paved the way for the modern state of Texas. Patrick Cox explores how these news barons identified the needs of the state and set out to attract private investors and public funding that would boost the state's civic and military infrastructure, oil and gas industries, real estate market, and agricultural production. He shows how newspaper owners used events such as the Texas Centennial to promote tourism and create a uniquely Texan identity for the state. To balance the record, Cox also demonstrates that the news barons downplayed the interests of significant groups of Texans, including minorities, the poor, and underemployed union members and a majority of women.

American Studies Jack Salzman, 1990-05-25 This volume supplements the acclaimed three-volume set published in 1986 and consists of an annotated listing of American Studies monographs published between 1984 and 1988. There are more than 6,000 descriptive entries in a wide range of categories: anthropology and folklore, art and architecture, history, literature, music, political science, popular culture, psychology, religion, science and technology, and sociology.

But for Birmingham Glenn T. Eskew, 2000-11-09 Birmingham served as the stage for some of the most dramatic and important moments in the history of the civil rights struggle. In this vivid narrative account, Glenn Eskew traces the evolution of nonviolent protest in the city, focusing particularly on the sometimes problematic intersection of the local and national movements. Eskew describes the changing face of Birmingham's civil rights campaign from the politics of accommodation practiced by the city's black bourgeoisie in the 1950s to local pastor Fred L. Shuttlesworth's groundbreaking use of nonviolent direct action to challenge segregation during the late 1950s and early 1960s. In 1963, the national movement in the person of Martin Luther King Jr. turned to Birmingham. The national uproar that followed on Police Commissioner Bull Connor's use of dogs and fire hoses against the demonstrators provided the impetus behind passage of the watershed Civil Rights Act of 1964. Paradoxically, though the larger victory was won in the streets of Birmingham, it did little for many of the city's black citizens, argues Eskew. The cancellation of protest marches before any clear-cut gains had been made left Shuttlesworth feeling betrayed, even as King claimed a personal victory. While African Americans were admitted to the leadership of the city, the way power was exercised and for whom remained fundamentally unchanged.

Planning White Supremacy Rebecca Coleen Retzlaff, 2025-11-15 *Planning White Supremacy* exposes how urban planners, bureaucrats, elected officials, and developers enforced racial segregation in Montgomery, Alabama, from 1920 to 1970. From zoning and redlining to

highway construction and urban renewal Rebecca Coleen Retzlaff uncovers how city planning was used to suppress activism and preserve white power and highlights the resilience of Black communities who resisted rebuilt and reimagined their neighborhoods across decades of discrimination
