New Directions In The Sociology Of Global Development

Philip McMichael, Heloise Weber

New Directions In The Sociology Of Global Development:

New Directions in the Sociology of Global Development Frederick H. Buttel, Philip D. McMichael, 2005-11-01 A collection of essays this volume is subdivided into sections posing research policy and strategic questions regarding social change It introduces conceptual innovations regarding the spatial boundaries of development sovereignty and the politics of globalization food regime analysis recompositions of rural activity and more The Oxford Handbook of International Law and Development, 2023-11-11 Since the mid twentieth century international law and international development have become two of the most prominent secular languages through which aspirations about a better world are articulated They have shaped the both the treatment and self understanding of the developing world often by positing the West as a universal model against which developing states their citizens and natural environments should be measured and disciplined In recent years however critical scholars have investigated the deep linkages between the concept of development the doctrines and institutions of international law and broader projects of ordering at the international level They have shown how the leading models de radicalise if not derail initiatives to redefine development and pursue other forms of global well being Bringing together scholars from both the Global South and the Global North the contributions in this Handbook invite readers to consider the limits of common normative and developmentalist assumptions At the same time the Handbook demonstrates how disparate but still identifiable set of ideas imaginaries norms and institutional practices related to law development and international governance shape today s profoundly unequal material conditions threatening the future of human and nonhuman life on the planet The book focuses on five distinct areas existing disciplinary frameworks institutions and actors regional theatres of international law and development competing social and economic agendas and alternative futures Offering a unique overview of the field of international law and development and assembling major critical historical and political economic insights this Handbook is an unmissable resource for scholars of international law international relations development studies and global history as well as anyone interested in the past present and future of our world New Directions in Agrarian Political Economy Ryan Isakson, 2017-10-02 How relevant are the classic theories of agrarian change in the contemporary context This volume explores this question by focusing upon the defining features of agrarian transformation in the 21st century the financialization of food and agriculture the blurring of rural and urban livelihoods through migration and other economic activities forest transition climate change rural indebtedness the co evolution of social policy and moral economies and changing property relations Combined the eleven contributions to this collection provide a broad overview of agrarian studies over the past four decades and identify the contemporary frontiers of agrarian political economy In this path breaking collection the authors show how new iterations of long evident processes continue to catch peasants and smallholders in the crosshairs of crises and how many manage to face these challenges developing new sources and sites of livelihood production This volume was published as part one of the special double issue celebrating the 40th

anniversary of the Journal of Peasant Studies *The Global Food System* William D. Schanbacher, 2014-07-23 This detailed analysis of the global food system looks at the way food is produced distributed and consumed in an effort to create a more equitable and healthful system worldwide With large scale famine afflicting regions around the globe and overconsumption and unhealthy eating habits destroying others many are beginning to wonder if access to food is less of a class based social problem and more of an ethical issue affecting the lives and livelihoods of people all over the world This thoughtful text provides a thorough examination of the factors contributing to this global concern exploring the complexities of international food supply and demand as well as the efforts to bring about a more just global food system Through this groundbreaking volume author and educator Will Schanbacher sheds light on flaws in the current structure and suggests ways to achieve a more balanced approach He considers the economics politics and activism behind and involved in the production distribution and consumption of the global food system In an effort to illuminate many problems associated with hunger inequality and injustice in the food system the book also offers many potential strategies and solutions for making a more healthy sustainable and equitable world Chapters contain both theoretical models and concrete practices for food security and offer strategies for creating an equitable system **The Oxford Handbook of Food History** Jeffrey M. Pilcher, 2012-10-16 Food matters not only as a subject of study in its own right but also as a medium for conveying critical messages about capitalism the environment and social inequality to diverse audiences Recent scholarship on the subject draws from both a pathbreaking body of secondary literature and an inexhaustible wealth of primary sources from ancient Chinese philosophical tracts to McDonald s menus contributing new perspectives to the historical study of food culture and society and challenging the limits of history itself The Oxford Handbook of Food History places existing works in historiographical context crossing disciplinary chronological and geographic boundaries while also suggesting new routes for future research The twenty seven essays in this book are organized into five sections historiography disciplinary approaches production circulation and consumption of food The first two sections examine the foundations of food history not only in relation to key developments in the discipline of history itself such as the French Annales school and the cultural turn but also in anthropology sociology geography pedagogy and the emerging Critical Nutrition Studies The following three sections sketch various trajectories of food as it travels from farm to table factory to eatery nature to society Each section balances material cultural and intellectual concerns whether juxtaposing questions of agriculture and the environment with the notion of cookbooks as historical documents early human migrations with modern culinary tourism or religious customs with social activism In its vast interdisciplinary scope this handbook brings students and scholars an authoritative guide to a field with fresh insights into one of the most fundamental human concerns Development and Social Change Philip McMichael, Heloise Weber, 2024-12-09 Development and Social Change explores the historical socio political and ecological aspects of development The Eighth Edition critically engages with the concept of development tracing its roots and

examining its implications in the contemporary world Authors Philip McMichael and Heloise Weber use case studies and examples to help describe a complex world in transition Students are encouraged to see global development as a contested historical project By showing how development stems from unequal power relationships between and among peoples and states often with planet threatening environmental outcomes it enables readers to reflect on the possibilities for more just social ecological and political relations

The Millennium Development Goals: Challenges, Prospects and Opportunities Nana Poku, Jim Whitman, 2017-07-05 As the 15 year Millennium Development Goals approach their conclusion we can now measure their larger successes and failures in more than snapshot fashion and we can begin to consider how best to shape the international development agenda for the coming decades based on what we have learned But the performance and outlook for the MDGs can neither be reduced to the sum of its eight goals nor be divorced from international dynamics the hard interests of states and other actors and the global dynamics that impact on both For that reason this volume balances contextual analysis the role of formative and constraining forces the importance of normative considerations and illuminating case studies to deliver a study of the MDGs which has depth and nuance as well as breadth Poised between judging the recent performance and the future promise of the MDGs this book is substantial provocative and timely This book was published as a special issue of Third World Quarterly

Global Foodscapes Alistair Fraser, 2016-07-22 What we eat as well as how it is produced processed moved sold and used by our bodies seems to matter like never before *Global Foodscapes* takes on this topicality and asks readers to think about how we are all involved in the making of an odd and in many ways troubling and contested food economy It explores how food is conceived traded grown reared processed sold and consumed investigates what goes wrong along the way and assesses what diverse people around the world are doing to fix these faults The text uses a carefully crafted framework that explores the interaction of five forms of oppression and five means of resistance as they are worked out over five stages in the food economy It draws on case studies from around the world that illuminate key issues about food in today's world examines how oppression affects diverse people caught up in the food economy and highlights how individuals groups and institutions such as governments but also firms are trying to improve how we interact with the food system *Global Foodscapes* is a highly accessible and useful text for undergraduate students interested in the global food economy The global range of case studies examples and reference points as well as its original framework allows the text to speak to diverse audiences and generate debate about whether anything and if so what needs to be done about the food system we depend upon so heavily Additional materials such as suggested readings and discussion points help students consider the issues at hand and conduct initial and more detailed research on today's food economy

Hegemonic Transitions, the State and Crisis in Neoliberal Capitalism Yildiz Atasoy, 2009-01-08 More than 15 years have passed since the end of the Cold War but uncertainty persists in the political economic shaping of the world economy and state system Although many countries have institutionalized neoliberal policies

since the mid 1970s these policies have not taken hold to the same degree nor have their effects been uniform across all countries Nevertheless there has been widespread deepening of inequalities and therefore scepticism towards the neoliberal project Uncertainty prevails not only in the relations between states but also in the relations between forces of capital citizens and political power within states Moreover there is conceptual confusion in our understanding of the events and processes of neoliberal global transformation This collection of essays provides a comprehensive theoretical and empirical examination of neoliberal restructuring as a complex political process In an effort to penetrate and clarify this complexity the book explores the connections between the economy state society and citizens while also offering current examples of resistance to neoliberalism The book provides a forum for rethinking politics that represents a turn to societal forces as essential not only to the uncovering of this complexity but also to the formulation of democratic possibilities beyond global hegemonic projects The book does not seek to produce a new model for social change nor does it dwell on the spatial aspects of modernity s new form or the emergence of a new state hegemony China or new forms of rule empire in managing the world capitalist economy Instead the book argues that an understanding of hegemonic transformations requires the problematization of global power as embedded in historically specific social relations

The Politics of Destination in the 2030 Sustainable Development Goals Clive Gabay, Suzan Ilcan, 2018-08-13 This book represents an unusual intervention in debates about the nature of contemporary international development where the majority of scholarship tends to concern itself with measuring or collating goal performance Through a series of analyses of the United Nations Sustainable Development Goals this book explores development as a political construct and is concerned with the kinds of epistemological hegemonic or politico economic assumptions built into contemporary development policy and the ensuing effectiveness the SDGs will have in terms of addressing or perpetuating the historical impoverishment of large groups of people living in poverty The contributors to the book take issue with many of the assumptions upon which SDGs rest while also broadening the conversation to pay attention to knowledge production modernity colonialism exclusion citizenship and other conceptual insights In this context the book raises questions about the discourses and practices of the SDGs especially in relation to how they can define the limits of what can be said and what can be done shape development logics through notions of division and forms of exclusion construct political problems as technical problems create certain spaces of imagination as a field of activity and endorse particular ideas and forms of knowledge in models for sustainable development This book was originally published as a special issue of Globalizations

The Enigmatic Realm of **New Directions In The Sociology Of Global Development**: Unleashing the Language is Inner Magic

In a fast-paced digital era where connections and knowledge intertwine, the enigmatic realm of language reveals its inherent magic. Its capacity to stir emotions, ignite contemplation, and catalyze profound transformations is nothing short of extraordinary.
