The Marriage between Literature and Music Nick Ceramella, 2022-03-17 Music and literature have often been interconnected through the centuries This is an intellectual and spiritual marriage between two artistic worlds which are

both part of a creative system that lends voice to one another As this book argues while music is one single form of expression literature can be expressed in the form of either poetry or prose However they find their apotheosis their most natural relationship when poetry is set to music especially when it is lyrical and has similar phrasing and rhythms to music The book thus shows that music offers an additional perspective to literature while the latter gives words to the feelings that the former arouses As such though both can stand alone if put together they form a complementary entity that everybody can enjoy
