New In Chebyearbook 18:

Yearbook of Agriculture ,1931 The Power of Femininity in the New South Anastatia Sims,1997 The Power of Femininity in the New South demonstrates how the legendary strength and moral authority of the South s steel magnolias inspired turn of the century women to move from the parlor to the political arena With a comprehensive examination of the women s voluntary associations that proliferated in North Carolina between 1880 and 1930 Anastatia Sims chronicles the emergence of women both black and white in a political terrain torn between the tyranny of white supremacy and the promise of Progressive reform She tells how organized women as they called themselves came to terms with a sacred cultural icon of the antebellum South the complex often contradictory ideal of southern femininity and how they explored the ideal s possibilities discovered its limitations and ultimately transformed it by their own actions Yearbook United States. Forest Service,1927 **The Forest Worker** ,1929 The Political Economy of Reforms and the Remaking of the Proletarian Class in China, 1980s-2010s Shan Shanne Huang,2023-01-19 This book comprehensively investigates the position of China s working class between the 1980s and 2010s and considers the consequences of economic reforms in historical perspective It argues the case that far from the illusion during the Maoist period that a new society had been established where the working classes held greater political and economic autonomy economic reforms in the post Mao era have led to the return of traditional Marxist proletariats in China The book demonstrates how the reforms of Deng Xiaoping have led to increased economic efficiency at the expense of economic equality through an extensive case study of an SOE state owned enterprise in Sichuan Province as well as wider discussions of the emergence of state capitalism on both a micro and macroeconomic level

The book also discusses workers protests during these periods of economic reform to reflect the reformation of class consciousness in post Mao China drawing on Marx s concept of a transition from a class in itself to a class for itself It will be valuable reading for students and scholars of Chinese economic and social history as well as political economy sociology and politics

Use of Force Arthur Mark Weisburd,1997-04-04 This book is among the few to develop in detail the proposition that international law on the subject of interstate force is better derived from practice than from treaties Mark Weisburd assembles here a broad body of evidence to support practice based rules of law on the subject of force Analyses of a particular use of force by a state against another state generally begin with the language of the Charter of the United Nations This approach is seriously flawed argues Weisburd States do not in fact behave as the Charter requires If the legal rule regulating the use of force is the rule of the Charter then law is nearly irrelevant to the interstate use of force However treaties like the Charter are not the only source of public international law Customary law too is binding on states If state behavior can be shown to conform generally to what amount to tacit rules on the use of force and if states generally enforce such rules against other states then the resulting pattern of practice strongly supports the argument that the use of force is affected by law at a very practical level This work aims to demonstrate that such patterns exist and to explain their content Weisburd discusses over one hundred interstate conflicts that took place from 1945 through 1991 He focuses on the behavior of the states using force and on the reaction of third parties to the use of force He concentrates upon state practice rather than upon treaty law and does not assume a priori that any particular policy goal can be attributed to the international legal system proceeding instead on the assumption that the system s goals can be determined only by examining the workings of the system
