Open Spaces offene Räume:

Offene Räume Jochem Schneider, Christine Baumgärtner, 2000 This book collects designs for 21 locations in the Stuttgart region results of an international workshop *Social Transnationalism* Steffen Mau, 2010-03-10 Social Transnationalism explores new forms of individual cross border interactions and mobility which have expanded across physical space It also investigates whether and to what degree increases in the volume of transnational interactions weaken the individual citizen's bond to the nation state and to what extent citizens' national identities are being replaced by cosmopolitan ones Sociologists in a Global Age Mathieu Deflem, 2016-04-01 Sixteen leading international sociologists are brought together in this volume to share their experiences of becoming practitioners in the field Selected for their comparative and transnational interests and experiences the contributors include Martin Albrow Karin Knorr Cetina Diane E Davis Pierpaolo Donati Leon Grunberg Horst J Helle Eiko Ikegami Tiankui Jing Hyun Chin Lim Ewa Morawska Richard Münch Saskia Sassen Joachim J Savelsberg Piotr Sztopka Edward A Tiryakian and Ruut Veenhoven Each contributor provides an auto biographical review of their journey into the discipline with special attention paid to the intellectual and social political contexts in which their work matured Each chapter concludes with a commentary on the anticipated future direction of that particular sociological area These original and reflective contributions provide fascinating and rare insights into the careers of sociologists living in a global age **Spatial Transformation** Milad Abassiharofteh, Jessica Baier, Angelina Göb, Insa Thimm, Andreas Eberth, Falco Knaps, Vilja Larjosto, Fabiana Zebner, 2022 What can be understood by spatial transformation how does it manifest itself and what are the characteristics of transformation processes This Research Report addresses these questions and presents current research projects and approaches from an academic and practical planning perspective A central point of reference is the concept of a Great Transformation which stems from an expert report by the German Advisory Council on Global Change WBGU It outlines the profound changes in the economy and society towards sustainability that will become necessary in the future describing them as a Great Transformation Likewise social upheavals also manifest themselves in space enabling spatial changes to be understood as spatial transformations However on a detailed level it remains unclear what is to be understood by spatial transformation processes and how they manifest themselves Against the background of this need for further research this Research Report addresses concrete issues in the research and shaping of spatial transformation processes The aim is to systematise the largely unordered or disordered knowledge of spatial transformation processes and to contribute to a common understanding of the associated concepts which can form the basis for further research and for the steering of these processes The articles on the following topics show how spatial and social transformation processes are mutually dependent and what opportunities and challenges inter and transdisciplinary research designs can offer in this context Perspectives on transformation processes Social and settlement structures in change Regional development and innovation Transformation processes in the so called Global South

New challenges for planning processes and stakeholders Research on transformation The contributions to theoretical methodological and practical approaches are intended to stimulate a critical discussion on spatial transformation that is open to new interdisciplinary perspectives **Reti verdi e disegno della città contemporanea** Lucia

Nucci, 2016-03-20T00:00:00+01:00 Il sistema del verde viene oggi riproposto in alcuni piani urbanistici pi recenti secondo un disegno di struttura caratterizzato dalla continuit e dal paradigma reticolare esso utilizzato come componente primaria di un operazione di riqualificazione ed integrazione della citt consolidata e della citt contemporanea caratterizzata dalla diffusione insediativa La ricerca indaga su i nuovi significati attribuiti al verde urbano con l impiego del paradigma reticolare continuit integrazione il ruolo che questo pu assumere quale strumento di riqualificazione ed integrazione urbana a partire dal riutilizzo degli open space in dismissione e degli spazi residuali la reale fattibilit ed efficacia insieme ai limiti delle tesi generali e delle sperimentazioni progettuali proposte o avviate su questi temi Il campo di approfondimento offerto dalle tesi sulla riqualificazione urbana di Rogers e dal dibattito e le riforme da queste suscitato che hanno determinato l impostazione del Nuovo Piano di Londra 2003 e dalle prime sperimentazioni progettuali avviate per la riqualificazione di parti della citt Il percorso consente di verificare l applicabilit di queste tesi alla riqualificazione della citt europea Le motivazioni ed il campo problematico della ricerca prendono le mosse dal considerare la larga disponibilit nella citt contemporanea insieme alle grandi aree di dismissione di aree e spazi minori residuali del processo insediativo come queste aree siano riconducibili a tipologie e fattori assai diversi come esse siano oggetto di usi impropri o inadeguati infine come i comportamenti ricorrenti nella progettazione tendano a trascurare o ignorare questi residui o ad utilizzarli in una visione frammentata dello spazio pubblico e del verde Recenti esperienze hanno dimostrato come questi spazi ed aree residue possano essere oggetto di una strategia pi complessiva per la riqualificazione della citt contemporanea *Philosophies of Place* Peter D. Herschok, Roger T. Ames, 2019-06-30 Humanity takes up space Human beings like many other species also transform spaces What is perhaps uniquely human is the disposition to qualitatively transform spaces into places that are charged with distinctive kinds of intergenerational significance There is a profound felt difference between a house as domestic space and a home as familial place or between the summit of a mountain one has climbed for the first time and the same rock pinnacle celebrated in ancestral narratives Contemporary philosophical uses of the word place often pivot on the distinction between space and place formalized by geographer philosopher Yi fu Tuan who suggested that places incorporate the experiences and aspirations of a people over the course of their moral and aesthetic engagement with sites and locations While spaces afford possibilities for different kinds of presence physical emotional cognitive dramatic spiritual places emerge as different ways of being present fuse over time and saturate a locale with distinctively collaborative patterns of significance This approach to issues of place however is emblematic of what Edward S Casey has argued are convictions about the primacy of absolute space and time that evolved along with the progressive dominance of the scientific imagination and modern imaginations of

the universal The recent reappearance of place in Western philosophy represents a turn away from abstract and a priori reasoning and back toward phenomenal experience and the primacy of embodied and emplaced intelligence Places are enacted through the sustainably shared practices of mutually responsive and mutually vulnerable agents and are as numerous in kind as we are divergent in the patterns of values and intentions The contributors to this volume draw on resources from Asian European and North American traditions of thought to engage in intercultural reflection on the significance of place in philosophy and of the place of philosophy itself in the cultural social economic and political domains of contemporary life The conversation of place that results explores the meaning of intercultural philosophy the critical interplay of place and personal identity the meaning of appropriate emplacement the shared place of politics and religion and the nature of the emotionally emplaced body

Urban open spaces as a resource Klever, Paul, Klotz, Steffen, Pappert, Lukas, Schulze, Jens, 2017-10-18 Space has to be discussed once one focuses on the commons the natural and cultural resources securing the well being of a community The question of availability of these resources includes asking for the place where they are accessible or where they are made accessible and thus always the question of the spatial organization of this society This publication wants to provide a first overview about historical types of commons about contemporary theories on urban commons and speculate about possible forms of future commoning Die Beschäftigung mit den Gemeingutern den elementaren natürlichen und kulturellen Ressourcen die dem Wohle der Gemeinschaft dienen fordert auch eine Auseinandersetzung mit Rhythmen Denn die Frage nach der Verfügbarkeit von Ressourcen schließt die Frage nach dem Ort an dem diese für die Gemeinschaft zugänglich sind oder zugänglich gemacht werden und damit immer auch die Frage nach der räumlichen Organisation dieser Gemeinschaft ein Diese Publikation gibt einen ersten Überblick über historische Typen von Allmenden über die aktuelle Theoriebildung zum Thema des urbanen Gemeingutes und spekuliert über mögliche Formen von zukünftigem Commoning
