Policy Controversies in Higher Education Samuel Kimball Gove, Thomas M. Stauffer, 1986-11-18 As we enter the mid eighties higher education is faced with deepening crises stemming from declines in both funding and enrollment and from rapidly changing social needs This volume of essays contributed by distinguished scholars from various disciplines identifies and discusses the many problems that will require attention in the coming decades if our colleges and universities are to continue to supply quality educational opportunities on a broad scale In seeking solutions to these problems the authors stress the need for a realistic appraisal of the policymaking system It is emphasized that educators and policymakers will need to take into account the levels at which political and policy making activity occur and the complex political interrelationships existing among the different levels of institutional governmental and public authority The States and Public Higher Education Policy Donald E. Heller, 2003-05-01 Among the many challenges facing higher education today affordability access and accountability are increasingly commanding the attention of the public and policymakers alike As students and their families struggle to meet rising tuition prices and state resources for the funding of higher education are constrained policymakers confront issues of affordability within state and institutional budgets Changing demographics and challenges to affirmative action complicate the admissions process even as colleges and universities seek to diversify enrollments And issues of institutional accountability have given rise to the restructuring of higher education governing boards and systems and to a reexamination of the role of public trustees in governance In The States and Public Higher Education Policy Donald E Heller and other higher education scholars and practitioners explore the debates surrounding issues of affordability access and accountability In a concluding chapter Heller considers the impact of technology on public colleges and universities a subject that dominates many discussions of higher education Offering a broad perspective that will appeal to policymakers and educators The States and Public Higher Education Policy provides an unobstructed view of key issues that will shape the future of higher education Higher Education: Handbook of Theory and Research Laura W. Van Der Slik,2001 In this fascinating theoretically informed case study of policy making Jack R Van Der Slik demonstrates partisan politics in action in Illinois Specifically he shows how major changes in governing state universities were enacted over the objections of members of the

higher education community who preferred to maintain the status quo In 1991 Republican Governor Jim Edgar enthusiastically aided by Lieutenant Governor Bob Kustra began a political effort to decentralize the system of systems which had governed state universities since the 1960s Despite partisan defeat of their plan in 1993 Edgar and Kustra managed to neutralize support for the status quo in the educational community After their 1995 landslide reelection which brought about Republican majorities in both houses of the legislature Edgar and Kustra were so successful in achieving their goals that they actually had to restrain the legislature's enthusiasm for decentralization the legislature wanted to extend decentralization to community colleges To account for these policy shifts Van Der Slik interviewed twenty five significant players from the executive branch of Illinois government from the legislature and from the educational community Grounding his study theoretically he compared his findings to previous studies in American policy making Jack Kingom's 1984 notion of the crucial role of the policy entrepreneur arguments in 1993 by Frank R Baumgartner and Bryan D Jones that public policies are inherently unstable and that discoverable phenomena can account for policy eruption and research in 1995 by Charles O Jones covering presidential transitions from Kennedy to Reagan In this analysis of political give and take Van Der Slik notes that elected officials proposed a solution to the problems of bureaucratic bloat and unresponsiveness that leaders of the higher education community would not support Political leaders based their actions on bold intuition rather than on a rational consideration of the consequences Given the possibility of change Van Der Slik observes politicians instinctively knew what policies to effect To a remarkable degree the political actions in Illinois fit the theoretical formulations of previous scholarship in national policy making As key participants recount their own actions and their observations then Van Der Slik places what happened in Illinois into a larger context
