Apter, 1994-12-19 This book probes three issues about the linkage between political protests and social change First why do individuals participate in protest activities including nonviolent movements and revolutions How do cultural beliefs sociopolitical structures personal attitudes motives and perceptions shape the decision to participate Second why do participants choose certain tactics Protesters use different types of tactics violent vs nonviolent public vs covert organized vs spontaneous and confrontation vs accommodation with other groups political parties and government agencies Most activists view a particular tactic as a useful means to attain their policy demands Third what policy consequences emerge from the activities of protest movements The book explores the impact of protests on social change and on the distribution of political power particularly greater access of subordinate groups to government policymakers A theory of political opportunities helps explain these issues about the origins activities and outcomes of protests Political Protest and Social Change Charles F.

Andrain, David Ernest Apter, 1995-09 At the close of the twentieth century political protests have erupted throughout the world While the collapse of communism was certainly one of the most spectacular protest related events smaller protests have become ubiquitous In Los Angeles labor activists campaign against commercial real estate owners to unionize janitors mainly Latina immigrants In the People's Republic of China peasants revolt against tax collectors Amazonian Indians protest public and economic policies that destroy their culture and rainforest habitat This book analyzes the reciprocal impact of cultural beliefs sociopolitical structures and individual behaviors on protests throughout the world Why do individuals participate in protest activities How do cultural beliefs personal attitudes and subjective perception influence the potential protester Addressing the issue of agency in protest the authors also examine why protestors enlist different tactics to achieve their goals Why are some protests violent and others nonviolent When and why do activists conclude that it is better to accommodate than confront Finally and crucially what are the consequences of protest movements **The Development of**

Political Institutions and Public Policy B. Steunenbergh, F. van Vught,2012-12-06 The discipline of public administration and public policy is experiencing a renaissance of research in which explicit attention is paid to political institutions This renewed interest in institutions is not simply an extension of the classical paradigm in the study of public administration which peaked in the 1920s and 1930s but offers a new orientation on political institutions While classical institutionalism is known for its focus on the formal structures of the executive branch of government the new institutionalism concentrates on the interaction between political institutions and the behavior of policy makers This interaction which until recently was largely neglected in public administration and public policy forms the basic theme of this volume To advance the study of political institutions two rather basic problems need to be addressed What are institutions and what are adequate ways to analyze them We briefly discuss both questions which determine the structure of this book

Social Enterprise in Asia Eric Bidet, Jacques Defourny, 2019-05-29 In the absence of a widely accepted and common definition of social enterprise SE a large research project the International Comparative Social Enterprise Models ICSEM Project was carried out over a five year period it involved more than 200 researchers from 55 countries and relied on bottom up approaches to capture the SE phenomenon This strategy made it possible to take into account and give legitimacy to locally embedded approaches thus resulting in an analysis encompassing a wide diversity of social enterprises while simultaneously allowing for the identification of major SE models to delineate the field on common grounds at the international level These SE models reveal or confirm an overall trend towards new ways of sharing the responsibility for the common good in today s economies and societies We tend to consider as good news the fact that social enterprises actually stem from all parts of the economy Indeed societies are facing many complex challenges at all levels from the local to the global level The diversity and internal variety of SE models are a sign of a broadly shared willingness to develop appropriate although sometimes embryonic responses to these challenges on the basis of innovative economic business models driven by a social mission In spite of their weaknesses social enterprises may be seen as advocates for and vehicles of the general

interest across the whole economy Of course the debate about privatisation deregulation and globalised market competition all factors that may hinder efforts in the search for the common good has to be addressed as well The first of a series of four ICSEM books Social Enterprise in Asia will serve as a key reference and resource for teachers researchers students experts policy makers journalists and other categories of people who want to acquire a broad understanding of the phenomena of social enterprise and social entrepreneurship as they emerge and develop across the world
