### **R 3 Data Management Techniques Using Tivoli Storage Manager:**

*R/3 Data Management Techniques Using Tivoli Storage Manager*, 2000      SAP Backup using Tivoli Storage Manager  
Budi Darmawan, Miroslav Dvorak, Dhruv Harnal, Gerson Makino, Markus Molnar, Rennad Murugan, Marcos Silva, IBM Redbooks, 2013-04-26 In this IBM Redbooks publication we give an overview of different data management topics related to a typical SAP data center. The intrinsic functionality of SAP is not designed to completely handle all the tasks of a data center by itself but the SAP system offers several interface possibilities to attach external tools to it to accomplish this task. We explain SAP basic concepts and the issues with SAP data management. We introduce Tivoli Storage Manager and all of its products that are related to SAP data management. We provide some comparison between database backup and recovery tools. Finally we discuss data archiving using IBM DB2 CommonStore for SAP and discuss high availability requirements and disaster recovery considerations. The second part of this book discusses a practical implementation of SAP backup and recovery with Tivoli Storage Manager. We implement this setup on two separate SAP systems one running DB2 and the other running Oracle database. We also implement LAN free backup and FlashCopy scenarios. In the sample implementation section we show many different tasks such as backup and restore database recovery backup monitoring and tuning. We also cover some advanced backup availability considerations such as split mirror backup and standby databases. This book helps individuals that operate an SAP environment to devise a strategy for a sound and comprehensive data backup solution using the IBM Tivoli Storage Management product family      **IBM Tivoli Storage Manager as a Data Protection Solution**
