Linguistic Philosophy Garth L. Hallett, 2008-02-28 How much authority should language the medium of communication be accorded as a determinant of truth and therefore of what we say Garth L Hallett argues that although never explicitly debated this is the most significant issue of linguistic philosophy Here for the first time he traces the issue's story Starting

with representative thinkers Plato Aquinas Kant Frege and the early Wittgenstein who contested language's authority the narrative then focuses on thinkers such as Carnap Tarski the later Wittgenstein Flew Russell Malcolm Austin Kripke Putnam Strawson Quine and Habermas who in different ways and to varying degrees accorded language more authority Implicit in this account is a challenge to philosophy as still widely practiced

Gonzalez, 2018-06-11 Contemporary philosophy of science analyzes psychology as a science with special features because this discipline includes some specific philosophical problems descriptive and normative structural and dynamic Some of these are particularly relevant both theoretically casual explanation and practically the configuration of the psychological subject and its relations with psychiatry Two central aspects in this book are the role of causality especially conceived as intervention or manipulation and the characterization of the psychological subject This requires a clarification of scientific explanations in terms of causality in psychology because characterizations of causality are quite different in epistemological and ontological terms One of the most influential views is James Woodward s approach to causality as intervention which entails an analysis of its characteristics new elements and limits This means taking into account the structural and dynamic aspects included in causal cognition and psychological explanations Psychology seen as special science also requires us to consider the scientific status of psychology and the psychological subject which leads to limits of naturalism in psychology **Existentialism.
