extremely sceptical that the constant search for higher standards and for ever increasing achievement scores can do much more than put in place seemingly neutral devices for restratification Michael W Apple John Bascom Professor of Curriculum and Instruction and Educational Policy Studies University of Wisconsin Madison Recent educational reforms have raised standards of achievement but have also resulted in growing inequalities based on race and social class School by school league tables play a central role in the reforms These have created an A to C economy where schools and teachers are judged on the proportion of students attaining five or more grades at levels A to C To satisfy these demands schools are embracing new and ever more selective attempts to identify ability Their assumptions and practices embody a new IQism a simple

narrow and regressive ideology of intelligence that labels working class and minority students as likely failures and justifies rationing provision to support those often white middle class boys already marked for success This book reports detailed research in two secondary schools showing the real costs of reform in terms of the pressures on teachers and the rationing of educational opportunity It will be important reading for any teacher researcher or policymaker with an interest in equality in education **Educating Our Black Children** Richard Majors,2005-06-29 Exclusion and expulsion of black children from schools is endemic in the US and UK This book takes a long hard look at the two countries and uncovers what they can learn from each other about approaching this problem *International Handbook of Migration, Minorities and Education* Zvi Bekerman,Thomas Geisen,2011-10-06 Migrants and minorities are always at risk of being caught in essentialized cultural definitions and being denied the right to express their cultural preferences because they are perceived as threats to social cohesion Migrants and minorities respond to these difficulties in multiple ways as active agents in the pedagogical political social and scientific processes that position them in this or that cultural sphere On the one hand they reject ascribed cultural attributes while striving towards integration in a variety of social spheres e g school and workplace in order to achieve social mobility On the other hand they articulate demands for cultural self determination This discursive duality is met with suspicion by the majority culture For societies with high levels of migration or with substantial minority cultures questions related to the meaning of cultural heterogeneity and the social and cultural limits of learning and communication e g migration education or critical multiculturalism are very important It is precisely here where the chances for new beginnings and new trials become of great importance for educational theorizing which urgently needs to find answers to current questions about individual freedom community cultural affiliations and social and democratic cohesion Answers to these questions must account for both political and learning perspectives at the macro mezzo and micro contextual levels The contributions of this edited volume enhance the knowledge in the field of migrant minority education with a special emphasis on the meaning of culture and social learning for educational processes **Race in the Schoolyard** Amanda E. Lewis,2003 Annotation An exploration of how race is explicitly and implicitly handled in school **Structural Injustices in Swedish Education** Dennis Beach,2018-09-17 While Sweden is often viewed as a benchmark for equality within education this book examines this assumption in greater depth The author argues that Sweden s education system even prior to the global spread of neoliberalism in education meta policies and privatization was never particularly equal Instead what became apparent was a system that offered advantages to the upper social classes under a sheen of meritocracy and tolerable inequalities Combining ethnographic and meta ethnographic methodologies and analyses the author examines the phenomenon of structural injustice in the Swedish education system both vertically and diachronically across a period of intensive transformation and reform This revealing volume offers a mode of engagement that will be of value and interest to researchers and students of injustices within education as well as policy makers and practitioners **Handbook of**
