Race For Security:

Race and National Security Matiangai V. S. Sirleaf, 2023 On both a national and global stage we are witnessing a reckoning on issues of racial justice This historical moment that continues to unfold in the United States and elsewhere also creates an opening to spark and revitalize debate and policy changes on a range of crucial topics including national security By surfacing the depths to which White hegemonic power influences our institutions and cultural assumptions we gain more accurate understanding of how race manifests in national security domestically transnationally and globally In *Race and National Security* leading experts challenge conventional interpretations of national security by illuminating the underpinning of White supremacy in our social consciousness The volume centers the experience of those who have long been on the receiving end of racialized state violence It finds that re envisioning national security requires more than just reducing the size and scope of the security state Contributors offer visions for reforming and transforming national security including adopting an abolitionist framework *Race and National Security* invites us to radically reimagine a world where the security state does not keep Black Brown and other marginalized peoples subordinated through threats of and actual incarceration violence torture and death *Race and National Security* is a groundbreaking volume which serves as a catalyst for remembering exposing and reconceiving the role of race in national security The *Just Security* book series from OUP tackles contemporary problems in international law and security that are of interest to a global community of scholars policymakers practitioners and students With each volume taking a particular thematic focus and gathering leading experts the series as a whole aims to rigorously and critically reflect on developments in these areas of law policy and practice Each volume will be accompanied by a series of shorter digital pieces in *Just Security*'s online forum at www.justsecurity.org which tie the discussion to breaking news and headlines

Dung - For Food Security And Survival Of Human Race Dr. Sahadeva Das, 2018-01-01 We have taken our food for granted and most of us have no idea where it comes from Jennifer Hill from Bristol recalls Several years ago I took my daughter and her friend to our allotments As we left I dug up a couple of bunches of my prized organic carrots and offered one of them to my daughter's friend With a look of absolute disgust the young girl said My mommy doesn't get food from the dirt She goes to Tesco's Still at least she knew what a carrot was Ask any child where their food comes from and the chances are he or she will say the supermarket And most adults don't know a lot more about how food ends up on their plate either Civilization survives on an ample supply of food and all previous civilizations developed near a food source When farm

productivity declined usually as a result of soil mismanagement civilizations also declined and occasionally vanished entirely

Security, Race, Biopower Holly Randell-Moon, Ryan Tippet, 2016-11-04 This book explores how technologies of media medicine law and governance enable and constrain the mobility of bodies within geographies of space and race Each chapter describes and critiques the ways in which contemporary technologies produce citizens according to their statistical risk or value in an atmosphere of generalised security both in relation to categories of race and within the new possibilities for locating and managing bodies in space The topics covered include drone warfare the global distribution of HIV prevention drugs racial profiling in airports Indigenous sovereignty consumer lifestyle apps and their ecological and labour costs and anti aging therapies *Security Race Biopower* makes innovative contributions to multiple disciplines and identifies emerging social and political concerns with security race and risk that invite further scholarly attention It will be of great interest to scholars and students in disciplinary fields including Media and Communication Geography Science and Technology Studies Political Science and Sociology *Day V.
