Race With A Dinosaur:

The Great Dinosaur Race Lynn Abrams, 2010-10-28 *Race with a Dinosaur* Dan Bagan, 2005-09-01 Cole Stubbins and his little brother Ricky have the perfect life. They had friends, hockey, a caring mother, and a brilliant paleontologist professor for a father who let his boys help construct real live dinosaur skeletons in their very own dining room. One evening Cole and Ricky were home alone waiting for the professor to bring home something for dinner. They decide to surprise him by piecing together as many bones as they could from a newly discovered type of *Albertasaurus*. Unbeknown to them, one of the bones held a deadly secret kept hidden for millions of years. When young Ricky accidentally cracks open this bone, he cuts his hand and absorbs some prehistoric radioactive fluid into his blood stream. He begins to gradually change, gaining some very unusual superhuman skills only a young dinosaur could have, as well as an illness that starts him on a deadly countdown for his life. There is only one way to save young Ricky. In a race against time, Cole must help the professor finish his Rediscover Time machine by finding a flawless diamond worth over one hundred million dollars. Then he must travel back to the age of the dinosaur to get the cure for Ricky's disease. But miracles happen, and the machine is completed, but there are technical problems, and Cole is the only one small enough and intelligent enough to make the journey. While back in time, everything goes horribly wrong, and Cole accidentally brings back a dinosaur named Albert to modern day Drumheller along with the cure for Ricky's illness. The trouble is the cure is inside the belly of Albert. Chaos breaks loose in the tiny town of Drumheller in this first of many adventures in the lives of the Stubbins family. *asthey Rediscover Time*

The Second Jurassic Dinosaur Rush Paul D. Brinkman,2024-05-31 The so called Bone Wars of the 1880s which pitted Edward Drinker Cope against Othniel Charles Marsh in a frenzy of fossil collection and discovery may have marked the introduction of dinosaurs to the American public but the second Jurassic dinosaur rush which took place around the turn of the twentieth century brought the prehistoric beasts back to life These later expeditions which involved new competitors hailing from leading natural history museums in New York Chicago and Pittsburgh yielded specimens that would be reconstructed into the colossal skeletons that thrill visitors today in museum halls across the country Reconsidering the fossil speculation the museum displays and the media frenzy that ushered dinosaurs into the American public consciousness Paul Brinkman takes us back to the birth of dinomania the modern obsession with all things Jurassic Featuring engaging and colorful personalities and motivations both altruistic and ignoble The Second Jurassic Dinosaur Rush shows that these later expeditions were just as foundational if not more so to the establishment of paleontology and the budding collections of museums than the more famous Cope and Marsh treks With adventure intrigue and rivalry this is science at its most swashbuckling

Bancel, Thomas David, Dominic Thomas, 2014-04-24 This edited collection explores the genesis of scientific conceptions of race and their accompanying impact on the taxonomy of human collections internationally as evidenced in ethnographic museums world fairs zoological gardens international colonial exhibitions and ethnic shows A deep epistemological change took place in Europe in this domain toward the end of the eighteenth century producing new scientific representations of race and thereby triggering a radical transformation in the visual economy relating to race and racial representation and its inscription in the body These practices would play defining roles in shaping public consciousness and the representation of otherness in modern societies *The Invention of Race* provides contextualization that is often lacking in contemporary discussions on diversity multiculturalism and race
