Fletcher Class Destroyers Lester Abbey, 2007-11-26 The ShipCraft series provides in depth information about building and modifying model kits of famous warship types Lavishly illustrated each book takes the modeller through a brief history of the subject class using scale plans to highlight differences between sisterships and changes in their appearance over their careers then moves to an extensive photographic survey of either a high quality model or a surviving example of the ship Hints on building the model and on modifying and improving the basic kit are followed by a section on paint schemes and camouflage featuring numerous colour profiles and highly detailed line drawings The strengths and weaknesses of available kits of the ships are reviewed and the book concludes with a section on research references books monographs large scale plans and relevant websites The subject of this volume is the Fletcher class often considered the most successful of all American destroyers Built to the first design that was freed from treaty restrictions they came into service near the beginning of the Pacific War and fought with distinction through all the most ferocious of the campaigns against Japan They were constructed in large numbers with a number of variations and their popularity is reflected by the wide range of available kits      **Fighting in the Dark** Vincent P. O'Hara, Trent Hone, 2025-01-16 Fighting in the Dark is a new book about naval combat at night the title also however signifies the overarching theme of the book of moving from dark to light in short the process of mastering technological change during war The authors start with the proposition that it is hard to hit an invisible target particularly one in motion In the nineteenth century when ships relied upon visual signaling and vessels beyond hailing range were deaf and mute in the dark night battles at sea were rare and largely accidental Three inventions changed this the torpedo the searchlight and the radio These inventions at the end of the nineteenth and start of the twentieth centuries transformed naval warfare by making combat in the dark feasible and in some cases desirable The process by which navies used the dark and adapted it into a medium for effective combat was long and difficult more so for some than others This book is about that process and about how Russian British German Italian Japanese and US navies confronted the specific new challenges and adapted to unfamiliar situations and emerging technologies Fighting in the Dark

consists of chapters written by a group of highly respected naval historians and the book's approach illuminates how different navies and cultures approached common problems. The fierce night time battles that are described serve as a metaphor for the larger issues and the reader is led along a fascinating journey of naval warfare from the Russo Japanese War through WWI to the Second World War and from the Pacific to the English Channel. *Science!* DK, 2018-08-07 See science as you've never seen it before. Innovating Victory Vincent OHara, Leonard R Heinz, 2022-04-15 Innovating Victory Naval Technology in Three Wars studies how the world s navies incorporated new technologies into their ships their practices and their doctrine It does this by examining six core technologies fundamental to twentieth century naval warfare including new platforms submarines and aircraft new weapons torpedoes and mines and new tools radar and radio Each chapter considers the state of a subject technology when it was first used in war and what navies expected of it It then looks at the way navies discovered and developed the technology s best use in many cases overcoming disappointed expectations It considers how a new technology threatened its opponents not to mention its users and how those threats were managed Innovating Victory shows that the use of technology is more than introducing and mastering a new weapon or system Differences in national resources force mixtures priorities perceptions and missions forced nations to approach the problems presented by new technologies in different ways Navies that specialized in specific technologies often held advantages over enemies in some areas but found themselves disadvantaged in others Vincent P O Hara and Leonard R Heinz present new perspectives and explore the process of technological introduction and innovation in a way that is relevant to today s navies which face challenges and questions even greater than those of 1904 1914 and 1939

Fighting in the Dark Vincent OHara, Trent Hone, 2023-04-15

Before the twentieth century ships when relied upon visual signaling vessels beyond range of sight or a cannon shot were blind deaf and dumb in the dark making night battles at sea rare and near always accidental The introduction of certain technologies like the torpedo the searchlight radio and then radar transformed naval warfare by making night combat feasible and in some cases desirable The process by which navies integrated these new tools of war and turned the dark into a medium for effective combat however was long and difficult Fighting in the Dark tells the story of surface naval combat at night from the Russo Japanese War through World War II The book is about the process of confronting and mastering problems brought on by technological change during war It does this by examining seven periods focusing on the Imperial

Russian Navy in 1904 1905 the Imperial German Navy from 1914 1918 the Royal Navy from 1916 1939 the Regia Marina from 1940 1943 the Imperial Japanese Navy in 1942 the U S Navy in 1943 1944 and the Royal Navy and Royal Canadian Navy from 1943 1944 The chapters are written by authors hailing from Australia Canada Italy and the United States all recognized masters in their subject     *They Gave Me a Seafire* R. "Mike" Crosley, 2014-08-06 Superb one of the most honest candid and truly delightful memoirs the perfect memorial to one of the Fleet Air Arm s greats Aircrew Book Review A classic in every sense of the word this book charts Commander R Mike Crosley s service career in the Fleet Air Arm during the entire period of the Second World War Part of his service saw him in action aboard HMS Eagle flying Sea Hurricanes on the Harpoon and Pedestal Malta convoys of June and August 1942 It was during this time that he shot down his first enemy aircraft and survived the dramatic sinking of HMS Eagle From there he graduated on to Seafires the Naval equivalent of the Spitfire and flew this type in Combat Air Patrols over Norway and ramrod strikes from Operation Torch the invasion of French North Africa in November 1942 through to D Day in June 1944 in the European Theatre of Operations and then in the Pacific aboard HMS Implacable as part of the British Pacific Fleet in 1945 until the end of the Pacific War by which time he had command of his own combined squadron 801 and 880 *They Gave Me a Seafire* sets to bring the endeavors of Crosley to a whole new generation of enthusiasts and it should appeal across the board to fans of aviation naval history and families and friends of Armed Forces past and present The fascinating publication details Mike s incredible capacity for survival and sheer skill as a pilot which were remarked on at the time securing him a number of decorations Island Life Magazine     *Marine Aviation* United States.
