The Amazon Várzea Miguel Pinedo-Vasquez, Mauro L. Ruffino, Christine Padoch, Eduardo S. Brondízio, 2010-11-30 This book takes a multi disciplinary and critical look at what has changed over the last ten years in one of the world s most important and dynamic ecosystems the Amazon floodplain or v rzea It also looks forward assessing the trends that will determine the fate of environments and people of the v rzea over the next ten years and providing crucial information that is needed to formulate strategies for confronting these looming realities

Sociedades Caboclas Amazônicas Cristina Adams, 2006

Amazon Peasant Societies in a Changing

Environment Cristina Adams, Rui S. S. Murrieta, Walter A. Neves, Mark Harris, 2008-12-02 Amazonia is never quite what it seems. Despite regular attention in the media and numerous academic studies, the Brazilian Amazon is rarely appreciated as a historical place home to a range of different societies. Often left invisible are the families who are making a living from the rivers and forests of the region. Broadly characterizing these people as peasants, *Amazon Peasant Societies in a Changing Environment* seeks to bring together research by anthropologists, historians, political ecologists, and biologists. A new paradigm emerges which helps understand the way in which Amazonian modernity has developed. This book addresses a comprehensive range of questions from the politics of conservation and sustainable development to the organization of women's work and the diet and health of Amazonian people. Apart from offering an analysis of a neglected aspect of Amazonia, this collection represents a unique interdisciplinary exercise on the nature of one of the most beguiling regions of the world.

Forest, Field, and Fallow Antoinette M.G.A. Winkler-Prins, Kent Mathewson, 2021-01-12 This volume aims to present the essential work of geographer and historical ecologist William M. Denevan to explain the impact and influence his thinking had on the conceptual advancement not only in his own discipline but in a range of related disciplines such as anthropology, archaeology, and environmental history. The book is organized around eight themes demonstrating Denevan's early and profound insights on topics that remain of current relevance today and the scholarly impact his writing had on subsequent scholarship. The book is unique because it offers commentary from active scholars who address the impacts of Prof. Denevan's thinking and work on contemporary environmental and ecological issues with a focus on several groundbreaking themes: e.g. historical demography, agricultural landforms, cultural plant geography, human environmental impacts, indigenous agro-ecology, tropical agriculture, livestock, and landscape and synthetic contributions. This book will be of interest to a range of scholars in geography, anthropology, archaeology, history, and ecology, as well as to environmental managers and practitioners, especially those working for non-profit organizations and government organizations tasked with finding ways to adapt to global environmental change.

Anthropology, Economics, and Choice Michael Chibnik, 2011-11-01 In the midst of global recession, angry citizens and media pundits often offer simplistic theories about how bad decisions lead to crises. Many economists, however, base their analyses on rational choice theory, which assumes that decisions are made by well-informed, intelligent people who weigh risks, costs, and benefits. Taking a more realistic approach, the field of anthropology carefully looks at the underlying causes of choices at different times and places. Using case studies of choices by farmers, artisans, and bureaucrats drawn from Michael Chibnik's research in Mexico, Peru, Belize, and the United States, *Anthropology, Economics, and Choice* presents a clear-eyed perspective on human actions and their economic consequences. Five key issues are explored in depth: choices between paid and unpaid work; ways people deal with risk and uncertainty; how individuals decide whether to cooperate; the extent to which households can be regarded as decision-making units; and the

tragedy of the commons the theory that social chaos may result from unrestricted access to commonly owned property Both an accessible primer and an innovative exploration of economic anthropology this interdisciplinary work brings fresh insight to a timely topic **Working Forests in the Neotropics** Daniel Zarin,2004 Thomas Lovejoy The H John Heinz III Center for Science Economics and the Environment **Amazonian Dark Earths: Explorations in Space and Time** Bruno Glaser,William I. Woods,2013-12-14 **Amazonia in the Anthropocene** Nicholas C. Kawa,2016-05-10 Widespread human alteration of the planet has led many scholars to claim that we have entered a new epoch in geological time the Anthropocene an age dominated by humanity This ethnography is the first to directly engage the Anthropocene tackling its problems and paradoxes from the vantage point of the world s largest tropical rainforest Drawing from extensive ethnographic research Nicholas Kawa examines how pre Columbian Amerindians and contemporary rural Amazonians have shaped their environment describing in vivid detail their use and management of the region s soils plants and forests At the same time he highlights the ways in which the Amazonian environment resists human manipulation and control a vital reminder in this time of perceived human dominance Written in engaging accessible prose Amazonia in the Anthropocene offers an innovative contribution to debates about humanity s place on the planet encouraging deeper ecocentric thinking and a more inclusive vision of ecology for the future
