**Environmental Impacts of Microbial Insecticides** Heikki M.T. Hokkanen, Ann Hajek, 2013-06-29 Biological pesticides are increasingly finding their place in IPM and increasing numbers of products are making their way to the marketplace Particularly in China Latin America and Australia implementation is proceeding on a large scale However in the USA and Europe registration procedures for insect pathogens to be used for insect control have been established that require low levels of risk resulting in costs of retarding the implementation of microbial agents This book provides a review of the state of the art of studies on the environmental impact of microbial insecticides It originates from a Society for Invertebrate Pathology Microbial Control Division Symposium Assessment of environmental safety of biological insecticides organised in collaboration with the EU ERBIC research project FAIR5 CT97 3489 This symposium was initiated by Heikki Hokkanen and Chris Lomer and was held at the SIP Annual Meeting in 2001 in The Netherlands The emphasis in this book is on large scale use of microbial agents for insect control demonstrating how this use has been proceeding with minimal environmental impact This book is intended to be of use to regulatory authorities in determining whether further studies in certain areas are necessary and how to conduct them if needed or whether sufficient information has been collected already to permit full registration of many of these biological control agents
