Sails Before Engines Linda Hill,2025-03-03 Sails Before Engines unveils the captivating era when wind powered ships reigned supreme shaping global trade exploration and naval warfare This transformative period saw sailing ships act as the primary catalyst for globalization cultural exchange and technological advancement It's remarkable to consider that wind

power alone propelled massive ships across oceans connecting continents and fostering unprecedented economic growth The book explores how innovations in shipbuilding and navigation allowed sailors to chart new territories and establish trade routes fundamentally altering the course of human history The book adopts a chronological and thematic approach initially establishing the historical context of sailing technology before delving into the economic military and socio cultural impacts of the age of sail It examines how sailing ships drove the growth of maritime empires and influenced artistic and intellectual movements Furthermore the book analyzes naval tactics and the strategic importance of sea control during this period Finally it addresses the transition to steam power offering insights into the factors that led to the decline of sailing ships and the implications of this shift for global trade and the environment *Robotic Sailing 2017* Kjell Ivar Øvergård,2018-02-23

Robotic Sailing 2017 This book contains the peer reviewed papers presented at the 10th International Robotic Sailing Conference which was organized in conjunction with the 10th World Robotic Sailing Championship held in Horten Norway the 4th 9th of September 2017 The seven papers cover topics of interest for autonomous robotic sailing which represents some of the most challenging research and development areas The book is divided into two parts The first part contains papers which focus on the design of sails and software for the assessment and predication of sailboat performance as well as software platforms and middleware for sailboat competition and research The second part includes algorithms and strategies for navigation and collision avoidance on local mid and long range The differences in approach in the included papers show that robotic sailing is still an emerging cross disciplinary science The multitude of suggestions to the specific problems of prediction and simulation of sailboats as well as the challenges of route planning anti grounding and collision avoidance are good indicators of science in its infancy Hence we may expect the future to hold great advances for robotic sailing
