Salem Witchcraft With an Account of Salem Village and a History of Opinions on Witchcraft and Kindred Subjects (Complete) Charles Wentworth Upham,1959-01-01 IT is one of the distinguishing characteristics of the human being that he loves to contemplate the scenes of the past and desires to have his own history borne down to the future This like all the other propensities of our nature is accompanied by faculties to secure its gratification The gift of speech by which the parent can convey information to the child the old transmit intelligence to the young is an indication that it is the design of the Author of our being that we should receive from those passing away the narrative of their experience and communicate the results of our own to the generations that succeed us All nations have to a greater or less degree been faithful to their trust in using the gift to fulfil the design of the Giver It is impossible to name a people who do not possess cherished traditions that have descended from their early ancestors Although it is generally considered that the invention of a system of arbitrary and external signs to communicate thought is one of the greatest and most arduous achievements of human ingenuity yet so universal is the disposition to make future generations acquainted with our condition and history a disposition the efficient cause of which can only be found in a sense of the value of such knowledge that you can scarcely find a people on the face of the globe who have not contrived by some means or other from the rude monument of shapeless rock to the most perfect alphabetical language to communicate with posterity thus declaring as with the voice of Nature herself that it is desirable and proper that all men should know as much as possible of the character actions and fortunes of their predecessors on the stage of life *Revival: A History of Modern Culture: Volume II (1934)* Preserved Smith,2018-01-16 The understanding of history can be advanced only by the combination or alternation of analysis and synthesis Detailed research and generalizing survey are not antiethical but complementary For a long time however the specialist has reigned supreme in our schools The need is now surely for a return to synoptic writing The present work was undertaken to supply the need of a

synthesis It is a map of a large region not a geological chart of a square mile or the plan of a single city Its value if any lies in its view of the interrelations of large tracts of social and intellectual life not in the intensive investigation of narrow fields
