

Sales Forecasting Systems

- Strategic Sales Forecasting Systems usually include several varieties of forecasts: forecasts of sales for the industry as a whole, forecasts of sales for the entire organisation, forecasts of sales for each product or service, forecasts of sales for a new product or service, and forecasts for market segments.
- The results of these sales forecasts are often further categorised by sales territory and sales division. Regardless of type, sales forecasts are usually based on more than historical data; they are not merely projections of past trends.
- Sales forecasts are also based on assumptions about the activities of the competition, government action, shifting customer demand, economic trends, demographic trends, and a variety of other pertinent factors, including even the weather.
- From the sales forecast, tactical decisions regarding the directions of many other organisational functions will flow.

 Tsan-Ming Choi, Chi-Leung Hui, Yong Yu, 2013-11-29 Forecasting is a crucial function for companies in the fashion industry
 but for many real life forecasting applications in the the data patterns are notorious for being highly volatile and it is very
 difficult if not impossible to analytically learn about the underlying patterns As a result many traditional methods such as
 pure statistical models will fail to make a sound prediction Over the past decade advances in artificial intelligence and
 computing technologies have provided an alternative way of generating precise and accurate forecasting results for fashion
 businesses Despite being an important and timely topic there is currently an absence of a comprehensive reference source
 that provides up to date theoretical and applied research findings on the subject of intelligent fashion forecasting systems
 This three part handbook fulfills this need and covers materials ranging from introductory studies and technical reviews
 theoretical modeling research to intelligent fashion forecasting applications and analysis This book is suitable for academic
