## **Salmon Moon:**

*Moon* Edgar Williams, 2014-06-15 Long before a rocket hit the Moon in the eye in Georges Méliès's early film *Le Voyage dans la Lune* the earth's lone satellite had entranced humans. We have worshipped it as a deity, believed it to cause madness, used it as a means of organizing time, and we now know that it manipulates the tides. Our understanding of the Moon continues to evolve. Following the Moon from its origins to its rich cultural resonance in literature, art, religion, and politics, *Moon* provides a comprehensive account of the significance of our lunar companion. Edgar Williams explores the interdependence of the Earth and the Moon, not only the possibility that life on Earth would not be viable without the Moon, but also the way it has embedded itself in culture. In addition to delving into roles the Moon has played in literature, from science fiction and comics to poetry, he examines how Elizabeth I was worshipped as the Moon goddess Diana, the Moon's place in folklore and astrology, and humanity's long-standing dream of inhabiting its surface. Filled with entertaining anecdotes, this book is the kind of succinct, witty, and informative look at everything lunar that only comes around once in a blue moon.

**Kyuquot way** Susan M. Kenyon, 1980-01-01 This volume describes a modern Nootka community from a historical perspective. Despite evidence of significant change over time with respect to material culture, technology, and political institutions, considerable continuity exists insofar as codes of social interaction, community values, and ideals are concerned. Published in English.

**Being and Place among the Tlingit** Thomas F. Thornton, 2011-07-01 In *Being and Place among the Tlingit*, anthropologist Thomas F. Thornton examines the concept of place in the language, social structure, economy, and ritual of southeast Alaska's Tlingit Indians. Place signifies not only a specific geographical location but also reveals the ways in which individuals and social groups define themselves. The notion of place consists of three dimensions: space, time, and experience, which are culturally and environmentally structured. Thornton examines each in detail to show how individual and collective Tlingit notions of place, being, and identity are formed. As he observes, despite cultural and environmental changes over time, particularly in the post-contact era since the late eighteenth century, Tlingits continue to bind themselves and their culture to places and landscapes in distinctive ways. He offers insight into how Tlingits in particular and humans in general conceptualize their relationship to the lands they inhabit, arguing for a study of place that considers all aspects of human interaction with landscape. In Tlingit, it is difficult even to introduce oneself without referencing places. In Tlingit, Aani Tlingit Country, geographic references are embedded in personal names, clan names, house names, and most obviously in *k'waan* names, which define regions of dwelling. To say one is *Sheet'ka K'waan* defines one as a member of the Tlingit community that inhabits *Sheet'ka*. *Being and Place among the Tlingit* makes a substantive contribution to the literature on the Tlingit, the Northwest Coast, cultural area, Native American, and indigenous studies, and to the growing social scientific and humanistic literature on space, place, and landscape.
