Brevik, Christian Feller, 2023-09-22 Cultural understandings of soil are diverse and often ambiguous Cultural framing of soils is common worldwide and is highly consequential The implications of what place the earth has in people s world view and everyday life can be in line with or in conflict with natural conditions with scientific views or with agricultural practices The main assumption underlying this work is that soil is inescapably perceived in a cultural context by any human This gives

emergence to different significant webs of meaning influenced by religious spiritual or secular myths and by a wide range of beliefs values and ideas that people hold in all societies These patterns and their dynamics inform the human soil relationship and how soils are cared for protected or degraded Therefore there is need to deal inter culturally with different sources and types of knowledge and experience regarding soil a need to cultivate soil awareness and situationally appropriate care through inter and intra cultural dialogues and learning This project focuses on the human and intangible dimensions of soil To serve this aim the International Union of Soil Sciences IUSS founded a working group on Cultural Patterns of Soil Understanding that has resulted in this book which presents studies from almost all continents written by soil scientists and experts from other disciplines A major objective of this project is to promote intercultural literacy that gives readers the opportunity to appreciate soil across disciplinary and cultural boundaries in an increasingly globalized world

**Salt - The white gold of the earth** Marco Müller,2024-03-29 Salt white gold or white poison Elixir of life or pathogen How the primal element salt has ensured our survival and changed our lives is an exciting journey from the beginning of evolution to modern times How could these white grains which we hardly pay any attention to today once be called white gold The history of salt is extremely exciting the extraction of salt brought us important technical achievements and changed landscapes Cities and roads were built through mining and trade Wars were fought over salt and it brought down colonial powers Salt is thus closely interwoven with the history of mankind

*The Gospel Hoax* Stephen C. Carlson,2005 Secret Mark first became known to modern scholarship in 1958 when a newly hired assistant professor at Columbia University in New York by the name of Morton Smith visited the monastery of Mar Saba near Jerusalem and photographed its fragments Secret Mark was announced on the heels of many spectacular discoveries of ancient manuscripts in the Near East such as the Dead Sea Scrolls and the Nag Hammadi gnostic corpus in the late 1940s and promised to be just as revolutionary Secret Mark presents what appears to be a valuable albeit fragmentary witness to early Christian traditions traditions that might shed light on Jesus s most intimate behavior In this book Stephen C Carlson uses state of the art science to demonstrate that Secret Mark was an elaborate hoax created by Morton Smith Carlson s discussion places Smith s trick alongside many other hoaxes before probing the reasons why so many scholars have been taken in by it

Morley,1852 *Fortress of the Soul* Neil Kamil,2020-03-03 French Huguenots made enormous contributions to the life and culture of colonial New York during the seventeenth and eighteenth centuries Huguenot craftsmen were the city s most successful artisans turning out unrivaled works of furniture which were distinguished by unique designs and arcane details More than just decorative flourishes however the visual language employed by Huguenot artisans reflected a distinct belief system shaped during the religious wars of sixteenth century France In *Fortress of the Soul* historian Neil Kamil traces the Huguenots journey to New York from the Aunis Saintonge region of southwestern France There in the sixteenth century artisans had created a subterranean culture of clandestine workshops and meeting places inspired by the teachings of Bernard Palissy a potter alchemist and philosopher who rejected the communal militaristic ideology of the Huguenot majority which was centered in the walled city of La Rochelle Palissy and his followers instead embraced a more fluid portable and discrete religious identity that encouraged members to practice their beliefs in secret while living safely even prospering as artisans in hostile communities And when these artisans first fled France for England and Holland then left Europe for America they carried with them both their skills and their doctrine of artisanal security Drawing on significant archival research and fresh interpretations of Huguenot material culture Kamil offers an exhaustive and sophisticated study of the complex worldview of the Huguenot community From the function of sacred violence and alchemy in the visual language of Huguenot artisans to the impact among Protestants everywhere of the destruction of La Rochelle in 1628 to the ways in which New York s Huguenots interacted with each other and with other communities of religious dissenters and refugees *Fortress of the Soul* brilliantly places American colonial history and material life firmly within the larger context of the early modern Atlantic world **ESSENTIALS: Cocktails** Editors of Cider Mill Press,2025-05-27 Welcome to the ultimate

Price,Philip J. Carr,2018-01-16 Focusing on the daily concerns and routine events of people in the past Investigating the Ordinary argues for a paradigm shift in the way southeastern archaeologists operate Instead of dividing archaeological work by time periods or artifact types the essays in this volume unite separate areas of research through the theme of the everyday Ordinary activities studied here range from flint knapping to ceremonial crafting from subsistence to social gatherings and from the Paleoindian period to the nineteenth century Contributors demonstrate that attention to everyday life can help researchers avoid overemphasizing data and jargon and instead discover connections between the people of different eras This approach will also inspire archaeologists with ways to engage the public with their work and with the deep history of the southeastern United States      **Writing Home** Elmer Kennedy-Andrews,2008 The idea of place and of being displaced is a powerful leit motif in Northern Irish poetry It is here explored in depth from the 1960s to the present day Ideas of home place and identity have been continually questioned re imagined and re constructed in Northern Irish poetry Concentrating on the period since the outbreak of the Troubles in the late 1960s this study provides a detailed consideration of the work of several generations of poets from Hewitt and MacNeice to Fiacca and Montague to Simmons Heaney Mahon and Longley to Muldoon Carson Paulin and McGuckian to McDonald Morrissey Gillis and Flynn It traces the

extent to which their writing represents a move away from concepts of rootedness and towards a deterritorialized poetics of displacement mobility openness and pluralism in an era of accelerating migration and globalisation In the new readings of place inherited maps are no longer reliable and home is no longer the stable ground of identity but seems instead to be always where it is not The crossing of boundaries and the experience of diaspora open up new understandings of the relations between places a new sense of the permeability and contingency of cultures and new concepts of identity and home
